72-5149.   Same; low enrollment weighting; high enrollment weighting. (a) The low enrollment weighting of each school district shall be determined by the state board as follows:

(1)   For school districts with an enrollment of fewer than 100 students, multiply the enrollment of the school district by 1.014331. The resulting product is the low enrollment weighting of the school district;

(2)   for school districts with an enrollment of at least 100 students, but fewer than 300 students:

(A)   Subtract 100 from the enrollment of the school district;

(B)   multiply the difference obtained under subsection (a)(2)(A) by 9.655;

(C)   subtract the product obtained under subsection (a)(2)(B) from 7,337;

(D)   divide the difference obtained under subsection (a)(2)(C) by 3,642.4;

(E)   subtract one from the quotient obtained under subsection (a)(2)(D); and

(F)   multiply the difference obtained under subsection (a)(2)(E) by the enrollment of the school district. The resulting product is the low enrollment weighting of the school district;

(3)   for school districts with an enrollment of at least 300 students, but fewer than 1,622 students:

(A)   Subtract 300 from the enrollment of the school district;

(B)   multiply the difference obtained under subsection (a)(3)(A) by 1.2375;

(C)   subtract the product obtained under subsection (a)(3)(B) from 5,406;

(D)   divide the difference obtained under subsection (a)(3)(C) by 3,642.4;

(E)   subtract one from the quotient obtained under subsection (a)(3)(D); and

(F)   multiply the difference obtained under subsection (a)(3)(E) by the enrollment of the school district. The resulting product is the low enrollment weighting of the school district.

(b)   For school districts with an enrollment of at least 1,622 students, multiply the enrollment of the school district by 0.03504. The resulting product is the high enrollment weighting of the school district.
