Re: HB: 2601

Dear Education Committee Members,

My name is Victoria Grant. My family and I live in McPherson County. My husband has deep roots in Kansas.

I was born and raised in Louisiana, I've lived here for almost 15 years now. My heart belongs to this great state, that is why I am writing to you now. I have faith that you will uphold the values of your citizens.

I will keep this short. My husband I hold traditional values in our home, We are Christians. We have been growing our family for about 12 years. God has entrusted us to protect the blessing we have received from him. Sadly before we knew better we failed as parents to two of our children. We have five beautiful blessing. Three boys and two girls. To keep this short, I will be telling you about my boys. My oldest is fully vaccinated and was diagnosed with classic autism at two years old. Our second son was vaccinated up till his two month shots. After receiving his two month shots that afternoon he started having breathing problems. That night we went to the E.R., they put us in a room and we stayed there for three days with him being on oxygen. We went home praying the worst was behind us but it wasn't that night he turned blue and we rushed back to the E.R.. We ended up being rushed to Wesley PICU. He was put on a C-Pap machine. He had a collapse lung and the other was infected. We were there for over a week. We almost lost our baby. I'm telling you this because like us we didn't know that the D-Tap that he received had side effects that are listed including; Brachial neuritis (nerve inflammation), Permanent brain damage, Respiratory distress and many more. We firmly believe the D-Tap damaged our son. He was never the same afterwards.

He was diagnosed with severe brain damage, autism and more. We looked more into vaccines at that point and found not only do vaccines have life altering side effects but also included aborted fetal cells in vaccines. We then decided to never vaccinate again! God is good and opened our eyes to the truth. Our third son is vaccine free and is our only healthy, damage free son!

Autism does not run in our family. We have done many DNA test to find what the doctors called an autistic gene. They could not find a single reason why two of our boys are autistic and have this issue. We cannot and will not vaccinate knowing our children's lives are on the line, never again will we trust anyone with the health of our blessing besides the good lord.

Thank you for hearing our voice. Taking the time to hear your citizens concerns on this very important matter.

The Grant Family  
McPherson County
