Re: Kansas Medical Cannabis

I am Tanya Roth, President and CEO of Canna Matriarchs, Inc. a Missouri Non-Profit corporation. On behalf of this organization I am writing to express our support for the legalization of medicinal cannabis in the state of KS. Within our organization you will find thousands of real life testimonials on the benefits and relief cannabis has brought to many families. Cancer, chronic pain conditions, mental health, addiction, gastrointestinal pain and discomfort, and so many more health conditions are being successfully treated with cannabis. 45 out of the 50 states have some form of cannabis legalization and Kansas constituents overwhelmingly support cannabis legalization for medical patients. Therefore, we strongly encourage the KS legislature to take these statements and patient testimonials, as well as the examples of successful medical programs in neighboring states into consideration and allow the voters to choose this November to legalize medical cannabis in Kansas.

Sincerely,

Tanya Roth
