In support of SB 212

Chairman Hilderbrand and Senate Public Health and Welfare Committee Members -

Please support SB 212 and allow the people of Kansas to have representation through their elected officials rather than placing the vaccine schedule solely in the hands of one unelected bureaucrat. We saw what happened this year when Kansas made national headlines over the Secretary of Health's manipulation of mask numbers and also how the PCR tests in KS were being run by too many cycles causing many false positives all under our KDHE.

The KDHE works for the CDC and unfortunately that agency has become a vaccine company: they buy, sell, and hold patents on vaccines. Even members of the FDA benefit financially from patents on the HPV vaccine. All of our agencies and politicians are allowed to receive funding from unaccountable foundations and corporations with conflicts of interest. Added to that, congress has given blanket immunity from liability to vaccines via the NCVIA, Cures Act, and PREP Act. Our government has also gone into partnership with these corporations and foundations for the Covid vaccine which is unethical. The Covid stimulus bill granted the CDC \$500 million for surveillance and gave the Gates foundation 3.2 billion of our tax dollars for global vaccine distribution. We are protecting government and corporations over the private citizens, sadly.

Yet at the same time only one ingredient in one vaccine was looked at for causing autism and the findings were scrubbed. (See Plotkin disposition below.) No one has studied the synergistic effect of receiving multiple vaccines at one time, no one has studied their effects on fertility, nor mutagenic (cancer) ability. (See 13.1 of vaccine inserts.) There has been one independent vaccinated vs. unvaccinated study done recently and rather than do further study, they removed the doctor's license after its release.

As a follower of Jesus Christ, I also object to using aborted baby parts to research and develop these medical products. All live vaccines contain dna fragments. The new mRNA technology uses them for research and testing. There has never been a study done on the long term injection of residual dna fragment effects. But this is just one reason why religious exemptions are still needed.

It is past time to investigate these financial conflicts of interest. Politicians and the agencies designed to protect us should not receive contributions from those who stand to benefit financially nor should they be allowed to hold patents. Unelected bureaucrats should not be the sole source to determine public health measures nor be allowed to impose unconstitutional mandates across the board. Great scientists hold a variety of opposing opinions. Who gets to decide which science we follow especially when research can be bought?

These are just a few reasons why we are asking you to support SB 212.

Thank you.
