AN ACT concerning the state corporation commission; relating to electric public utilities; pertaining to financing therefor; authorizing the approval and issuance of energy transition bonds; enacting the Kansas grid resiliency, innovation and dependability act; amending K.S.A. 66-1239 and K.S.A. 2020 Supp. 84-9-109 and repealing the existing sections.

Be it enacted by the Legislature of the State of Kansas:

New Section 1. (a) Sections 1 through 14, and amendments thereto, shall be known and may be cited as the Kansas grid resiliency, innovation and dependability act.

(b) As used in the Kansas grid resiliency, innovation and dependability act:

(1) "Adjustment mechanism" means a formula-based rate adjustment, or true-up process approved by the commission and subject to timely review to confirm compliance, for making, at least annually, expeditious periodic adjustments to energy transition charges that customers are required to pay, as authorized in a financing order. "Adjustment mechanisms" are utilized to make necessary corrections to adjust for over-collection or under-collection of such energy transition charges or otherwise to ensure the timely and complete payment of the energy transition bonds and all other financing costs and other required amounts and charges payable in connection with the energy transition bonds.

(2) "Ancillary agreement" means any bond, insurance policy, letter of credit, reserve account, surety bond, interest rate lock or swap arrangement, hedging arrangement, liquidity or credit support.

(3) "Assignee" means a corporation, limited liability company, general partnership, limited partnership, public authority, trust, financing entity or other entity to which an electric public utility assigns, sells or transfers, other than as security, all or a portion of its interest in, or right to, energy transition property.

(4) "Bondholder" means any holder or owner of an energy transition bond.

(5) "Code" means the Kansas uniform commercial code.

(6) "Commission" means the state corporation commission.

(7) "Electric public utility" means the same as defined in K.S.A. 66-
"Electric public utility" does not include a cooperative that has opted to deregulate pursuant to K.S.A. 66-104d, and amendments thereto.

(8) "Energy transition bonds" means bonds, debentures, notes, certificates of participation, certificates of beneficial interest, certificates of ownership or other evidences of indebtedness or ownership that have a scheduled maturity date as determined reasonable by the commission, but not later than 32 years from the issue date, that are issued by an electric public utility or an assignee pursuant to a financing order, the proceeds of which are used directly or indirectly to recover, finance or refinance commission-approved energy transition costs and financing costs, and that are secured by or payable from energy transition property. If certificates of participation or ownership are issued, references in this section to principal, interest or premium shall be construed to refer to comparable amounts under those certificates.

(9) "Energy transition charge" means the amounts authorized by the commission to provide a source of revenue solely to repay, finance, or refinance energy transition costs and financing costs and that are nonbypassable charges imposed on, and part of all retail customer bills collected by an electric public utility or its successors or assignees, or a collection agent, in full, separate and apart from the electric public utility's base rates. "Energy transition charges" are paid by all existing or future retail customers receiving electrical service from the electric public utility or its successors or assignees under commission-approved rate schedules or under special contracts, even if a retail customer elects to purchase electricity from an alternative electricity supplier following a fundamental change in regulation of public utilities in this state.

(10) (A) "Energy transition costs" includes:
   
   (i) At the option of and upon application by an electric public utility, and as approved by the commission, any of the pretax costs that the electric public utility has incurred or will incur that are caused by, associated with, or remain as a result of a retired, abandoned, to be retired or to be abandoned electric generating facility that is the subject of an application for a financing order filed under this section where such early retirement or abandonment is deemed reasonable and prudent by the commission through a final order issued by the commission;
   
   (ii) "pretax costs," if determined reasonable by the commission and not inconsistent with a commission order granting predetermination under K.S.A. 66-1239, and amendments thereto, regarding retirement or abandonment of the subject generating facility, includes, but is not limited to, the undepreciated investment in the retired or abandoned electric generating facility and any facilities ancillary thereto or used in
conjunction therewith, costs of decommissioning and restoring the site of
the electric generating facility, other applicable capital and operating costs,
accrued carrying charges and deferred expenses. Such "pretax costs" shall
be reduced by applicable insurance, scrap and salvage proceeds and
include the cost of retiring any existing indebtedness, fees, costs and
expenses to modify existing debt agreements or for waivers or consents
related to existing debt agreements; and
(iii) "pretax costs" that an electric public utility has previously
incurred related to the retirement of such a coal-fired electric generating
facility occurring before the effective date of this section.
(B) "Energy transition costs" does not include any monetary penalty,
fine or forfeiture assessed against an electric public utility by a
governmental agency or court under a federal or state statute or rule or
regulation.
(11) "Energy transition property" includes:
(A) All rights and interests of an electric public utility, its successor
or under a financing order, including the right to impose, bill, charge,
collect and receive energy transition charges authorized under the
financing order and to obtain periodic adjustments to such charges
authorized under this section and as provided in the financing order; and
(B) all revenues, collections, claims, rights to payments, payments,
money or proceeds arising from the rights and interests specified in the
financing order, regardless of whether such revenues, collections, claims,
rights to payment, payments, money or proceeds are imposed, billed,
received, collected or maintained together with or commingled with other
revenues, collections, rights to payment, payments, money or proceeds.
(12) "Financing costs" includes, if authorized by the commission in a
financing order, costs to issue, service, repay or refinance energy transition
bonds, whether incurred or paid upon issuance of the energy transition
bonds or over the life of the energy transition bonds, including:
(A) Principal, interest and acquisition, defeasance, or redemption
premiums payable on energy transition bonds;
(B) any payment required under an ancillary agreement and any
amount required to fund or replenish a reserve account or other accounts
established under the terms of any indenture, ancillary agreement, or other
financing documents pertaining to energy transition bonds;
(C) any other cost related to issuing, supporting, repaying, refunding
and servicing energy transition bonds, including, but not limited to,
servicing fees, accounting and auditing fees, trustee fees, legal fees,
consulting fees, financial or structuring adviser fees, administrative fees,
placement and underwriting fees, independent director and manager fees,
capitalized interest, rating agency fees, stock exchange listing and
compliance fees, security registration fees, filing fees, information
technology programming costs and any other costs necessary to otherwise ensure the timely payment of energy transition bonds or other amounts or charges payable in connection with energy transition bonds, including costs related to obtaining the financing order;

(D) any taxes and license fees or other fees imposed on the revenues generated from the collection of the energy transition charge or otherwise resulting from the collection of energy transition charges, whether paid, payable or accrued;

(E) any state and local taxes, franchise fees, gross receipts and other taxes or similar charges, including commission assessment fees, whether paid, payable or accrued; and

(F) any costs of the commission needed to perform the commission responsibilities under this act including costs to engage counsel and a financial adviser.

(13) "Financing order" means:

(A) An order from the commission pursuant to this act that authorizes the issuance of energy transition bonds in one or more series;

(B) the imposition, collection and periodic adjustments of an energy transition charge

(C) the creation of energy transition property; and

(D) the sale, assignment or transfer of energy transition property to an assignee.

(14) "Financing party" means bondholders and trustees, collateral agents, any party under an ancillary agreement or any other person acting for the benefit of bondholders.

(15) "Financing statement" means the same as defined in K.S.A. 84-9-102, and amendments thereto.

(16) "Nonbypassable" means that the payment of an energy transition charge may not be avoided by any existing or future retail customer located within an electric public utility service area, as such service area existed on the date of the financing order, or, if the financing order so provides, as such service area may be expanded, even if the customer elects to purchase electricity from a supplier other than the electric utility, or its successors or assignees, or receives retail electric service from another electric utility operating in the same service area.

(17) "Pledgee" means a financing party to which an electric public utility, or its successors or assignees, mortgages, negotiates, pledges or creates a security interest or lien on all or any portion of its interest in or right to energy transition property.

(18) "Successor" means, with respect to any legal entity, another legal entity that succeeds by operation of law to the rights and obligations of the first legal entity pursuant to any bankruptcy, reorganization, restricting, other insolvency proceeding, merger, acquisition, consolidation or sale or
transfer of assets, regardless of the reason such event occurs.

New Sec. 2. (a) An electric public utility, in its sole discretion, may apply to the commission for a financing order as authorized by the Kansas grid resiliency, innovation and dependability act.

(1) In applying for the financing order, the electric public utility may file an application to issue energy transition bonds in one or more series, impose, charge and collect energy transition charges and create energy transition property related to the recovery of energy transition costs.

(2) Within 45 days after a complete application is filed, the commission shall establish a procedural schedule that requires the commission to issue a decision on the application not later than 135 days from the date a complete application was filed.

(3) The commission shall take final action to approve, approve subject to conditions the commission considers appropriate and that are authorized by this section or deny any application for a financing order in a final order issued in accordance with the commission's rules for addressing applications within 135 days of receiving a complete application as authorized by this act. Such final order shall be subject to judicial review in accordance with K.S.A. 66-118a through 66-118o, and amendments thereto, and shall be deemed as arising from a rate hearing pursuant to K.S.A. 66-118a(b), and amendments thereto.

(4) As a prerequisite of filing an application, an electric public utility shall have obtained an order from the commission under K.S.A. 66-1239, and amendments thereto, finding retirement or abandonment of the subject generating facility to be reasonable.

(b) The application shall include the following:

(1) A description of the electric generating facility or facilities that the electric public utility has retired, or proposes to retire, prior to the date that all undepreciated investment relating thereto has been recovered through rates and the reasons for undertaking such early retirement or abandonment. If the electric public utility is subject to a separate commission order or proceeding relating to such retirement or abandonment or as described in paragraph (4), the application shall include a description of the order or other proceeding;

(2) a description of the energy transition costs that the applicant proposes to recover with the proceeds of the energy transition bonds;

(3) (A) an indicator of whether the electric public utility proposes to finance all or a portion of the energy transition costs using energy transition bonds. If the electric public utility proposes to finance a portion of the energy transition costs, the electric public utility shall identify the specific portion in the application;

(B) by electing not to finance all or any portion of such energy transition costs using energy transition bonds, an electric public utility
shall not be deemed to waive its right to recover or request recovery of such costs pursuant to a separate proceeding with the commission;

(4) an estimate of the financing costs related to the energy transition bonds;

(5) an estimate of the energy transition charges necessary to recover the energy transition costs and all financing costs, the period for recovery of such costs and a description of the proposed financing structure, including the proposed scheduled and final maturity of the energy transition bonds;

(6) the proposed methodology for allocating the revenue requirement for the energy transition charge among customer classes, including special contract customers;

(7) a description of the nonbypassable energy transition charge required to be paid by all customers within the electric public utility's service area for recovery of energy transition costs and a proposed adjustment mechanism reflecting the allocation methodology referred to in paragraph (6);

(8) an estimate of the timing of the potential issuance of the energy transition bonds, or series of bonds;

(9) a comparison between the net present value of the costs to customers that are estimated to result from the issuance of energy transition bonds and the costs that would result from the application of the traditional method of financing and recovering the undepreciated investment of facilities that may become energy transition costs from customers. The comparison shall demonstrate that the issuance of energy transition bonds and the imposition of energy transition charges are expected to provide net quantifiable benefits to customers or that would avoid or mitigate rate impacts to customers;

(10) (A) specify a future ratemaking process to reconcile any difference between the energy transition costs financed by energy transition bonds and the final energy transition costs incurred by the electric public utility or the assignee;

(B) the reconciliation may affect the electric public utility's rates or any rider but shall not affect the amount of the energy transition bonds or the associated energy transition charges paid by customers; and

(11) direct testimony and schedules supporting the application.

(c) Following notice and hearing on an application for a financing order, as required by rules and regulations adopted by the commission, the commission may issue a financing order if the commission finds that the:

(1) Energy transition costs described in the application are just and reasonable; and

(2) proposed issuance of energy transition bonds and the imposition and collection of energy transition charges are expected to provide net
quantifiable benefits to customers when compared to the costs that would
result from the application of the traditional method of financing and
recovering the undepreciated investment of facilities or that would avoid
or mitigate rate impacts to customers.

(d) A financing order issued by the commission in response to an
application filed by an electric public utility, pursuant to this section, shall
include the following elements:

(1) The amount of energy transition costs to be financed using energy
transition bonds. The commission shall describe and estimate the amount
of financing costs and energy transition costs that may be recovered
through energy transition charges and specify the period over which
energy transition costs and financing costs may be recovered, that shall be
no earlier than the date of the final legal maturity of energy transition
bonds to be issued;

(2) an approved customer billing mechanism for energy transition
charges, including a specific methodology for allocating the necessary
energy transition charges among the different customer classes including
special contract customers and a finding that the resulting energy transition
charges will be just and reasonable;

(3) a finding that the proposed issuance of energy transition bonds
and the imposition and collection of an energy transition charge are
expected to provide net quantifiable benefits to customers as compared to
the traditional methods of financing and recovering energy transition costs
from customers or that would avoid or mitigate rate impacts to customers;

(4) a finding that the structuring, pricing and financing costs of the
energy transition bonds are expected to result in the lowest energy
transition charges, consistent with market conditions at the time the energy
transition bonds are priced and the terms of the financing order;

(5) a requirement that, for so long as the energy transition bonds are
outstanding and until all financing costs have been paid in full, the
imposition and collection of energy transition charges authorized under a
financing order shall be nonbypassable;

(6) an adjustment mechanism;

(7) a description of the energy transition property that is, or shall be,
created in favor of an electric public utility, or its successors and assignees,
and that shall be used to pay and secure the payment of energy transition
bonds and all financing costs authorized in the financing order;

(8) a statement specifying the degree of flexibility to be afforded to
the electric public utility in establishing the terms and conditions of the
energy transition bonds, including, but not limited to, repayment
schedules, expected interest rates and other financing costs;

(9) authorization for the applicant electric public utility to finance
energy transition costs through the issuance of one or more series of
energy transition bonds;
(10) a requirement that, after the final terms of an issuance of energy transition bonds have been established and before the issuance of energy transition bonds, the electric public utility determines the resulting initial energy transition charge is in accordance with the financing order and that such initial energy transition charge be final and effective upon the issuance of such energy transition bonds without further commission action so long as the energy transition charge is consistent with the financing order;
(11) a method of tracing funds collected as energy transition charges, or other proceeds of energy transition property, determining that such method shall be deemed the method of tracing such funds and determining the identifiable cash proceeds of any energy transition property subject to a financing order under applicable law;
(12) a statement specifying a future ratemaking process to reconcile any differences between the actual energy transition costs financed by energy transition bonds and the final energy transition costs incurred by the utility or assignee; and
(13) any other conditions that the commission deems appropriate and that are authorized by this section.
(e) A financing order issued to an electric public utility shall permit and may require the creation of the electric public utility's energy transition property that is conditioned upon the sale or other transfer of the energy transition property to an assignee and the pledge of the energy transition property to secure energy transition bonds.
(f) If the electric public utility has been issued a financing order, the electric public utility shall file with the commission, at least annually, an application or letter applying the adjustment mechanism based on estimates of consumption for each rate class and other mathematical factors and requesting administrative approval to make the applicable adjustments. The commission's review of the filing shall be limited to determining if any mathematical or clerical errors are present in the application of the adjustment mechanism relating to the appropriate amount of any over-collection or under-collection of energy transition charges and the amount of an adjustment. The adjustments shall ensure the recovery of revenue is sufficient to provide for the payment of principal, interest, acquisition, defeasance, financing costs or redemption premium and other fees, costs, and charges with respect to the energy transition bonds approved under the financing order. Within 30 days after receiving an electric public utility's application or letter pursuant to this paragraph, the commission shall either approve the application or letter or inform the electric public utility of any mathematical or clerical errors present in its calculation. If the commission informs the electric public utility of the
presence of mathematical or clerical errors in its calculation, the electric public utility may correct its error and refile its request. The time frames previously described in this paragraph shall apply to a refiled request.

(g) (1) Upon the transfer of the energy transition property to an assignee or the issuance of energy transition bonds authorized thereby, whichever occurs first, a financing order shall become irrevocable. Except for changes made pursuant to the adjustment mechanism authorized in this section, the commission shall not amend, modify or terminate the financing order by any subsequent action or reduce, impair, postpone, terminate or otherwise adjust energy transition charges approved in the financing order.

(2) After the issuance of a financing order, the electric public utility shall retain sole discretion regarding the decision to assign, sell or otherwise transfer energy transition property or to cause energy transition bonds to be issued, including the right to defer or postpone such assignment, sale, transfer or issuance.

(3) The commission, in a financing order and subject to the issuance advice letter process under paragraph (4), shall afford the electric public utility flexibility in establishing the terms and conditions for the energy transition bonds to accommodate changes in market conditions, including repayment schedules, interest rates, financing costs, collateral requirements, required debt service and other reserves and the ability of the electric public utility, at its option, to effect a series of issuances of energy transition bonds and correlated assignments, sales, pledges or other transfers of energy transition property. Any changes made under this subsection to terms and conditions for the energy transition bonds shall be in conformance with the financing order.

(4) As the actual structure and pricing of the energy transition bonds will be unknown at the time the financing order is issued, the electric public utility that intends to cause the issuance of such bonds shall provide to the commission, to the extent requested and prior to the issuance of each series of bonds, an issuance advice letter following the determination of the final terms of such series of bonds no later than one day after the pricing of the energy transition bonds. The commission shall have the authority to designate a representative from commission staff, who may be advised by a financial adviser contracted with the commission, to observe all facets of the process undertaken by the electric public utility to place the energy transition bonds to market so the commission's representative can be prepared, if requested, to provide the commission with an opinion on the reasonableness of the pricing, terms and conditions of the energy transition bonds on an expedited basis. The form of such issuance advice letter shall be included in the financing order and shall indicate the final structure of the energy transition bonds and provide the best available
estimate of total ongoing costs. The issuance advice letter shall report the initial energy transition charges and other information specific to the energy transition bonds to be issued, as the commission may require. Unless an earlier date is specified in the financing order, the electric public utility may proceed with the issuance of the energy transition bonds unless, prior to noon on the fourth business day after the commission receives the issuance advice letter, the commission issues a disapproval letter directing that the bonds as proposed shall not be issued and the basis for that disapproval. The financing order may provide such additional provisions relating to the issuance advice letter process as the commission considers appropriate and as are authorized by this section.

(5) In performing the responsibilities of this section, the commission may engage a financial adviser and counsel as the commission deems necessary. All expenses associated with such services shall be included as part of the financing costs of the energy transition bonds and shall be included in the energy transition charge.

(6) If an electric public utility's application for a financing order is denied or withdrawn, or for any reason energy transition bonds are not issued, any costs of retaining a financial adviser and counsel on behalf of the commission shall be paid by the applicant electric utility and shall be eligible for full recovery by the electric public utility, including carrying costs, in the electric public utility's future rates.

(7) An adversely affected party may petition for judicial review in accordance with K.S.A. 66-118a and 77-607, and amendments thereto.

(h) At the request of an electric public utility, the commission may commence a proceeding and issue a subsequent financing order that provides for refinancing, retiring or refunding energy transition bonds issued pursuant to the original financing order if the commission finds that the subsequent financing order satisfies all of the criteria specified in this section for a financing order. Effective upon retirement of the refunded energy transition bonds and the issuance of new energy transition bonds, the commission shall adjust the related energy transition charges accordingly.

(1) A financing order remains in effect and energy transition property under the financing order continues to exist until energy transition bonds issued pursuant to the financing order have been paid in full or defeased and, in each case, all commission-approved financing costs of such energy transition bonds have been recovered in full.

(2) A financing order issued to an electric public utility remains in effect and unabated notwithstanding the reorganization, bankruptcy or other insolvency proceedings, merger or sale of the electric public utility or its successors or assigns.

New Sec. 3. (a) The commission shall not, in exercising its powers
and carrying out its duties regarding any matter within its authority, consider the:

(1) Energy transition bonds issued pursuant to a financing order to be the debt of the electric public utility other than for federal and state income tax purposes;
(2) energy transition charges paid under the financing order to be the revenue of the electric public utility for any purpose; or
(3) energy transition costs or financing costs specified in the financing order to be the costs of the electric public utility.

(b) The commission shall not determine any action taken by an electric public utility that is consistent with the financing order to be unjust or unreasonable, and K.S.A. 66-1a01, and amendments thereto, shall not apply to the issuance of energy transition bonds.

(c) No electric public utility shall be required to file an application for a financing order under this section or otherwise utilize this section. The commission shall not order or otherwise directly or indirectly require an electric public utility to use energy transition bonds to recover energy transition costs or to finance any project, addition, plant, facility, extension, capital improvement, equipment or any other expenditure. After the issuance of a financing order, the electric public utility shall retain sole discretion regarding the decision to cause the energy transition bonds to be issued, including the right to defer or postpone such sale, assignment, transfer or issuance. Nothing shall prevent the electric public utility from abandoning the issuance of energy transition bonds under the financing order by filing with the commission a statement of abandonment and the reasons therefor.

(d) Energy transition bonds authorized under the Kansas grid resiliency, innovation and dependability act shall not be subject to K.S.A. 66-125, and amendments thereto.

(e) The commission shall not refuse to allow an electric public utility to recover energy transition costs in an otherwise permissible fashion, or refuse or condition authorization or approval of the issuance and sale by an electric public utility of securities or the assumption by the electric public utility of liabilities or obligations, solely because of the potential availability of energy transition bond financing.

(f) The commission shall not, directly or indirectly, utilize or consider the debt reflected by the energy transition bonds in establishing the electric public utility's capital structure used to determine any regulatory matter, including, but not limited to, the electric public utility's revenue requirement used to set its rates.

(g) The commission shall not, directly or indirectly, consider the existence of energy transition bonds or the potential use of energy transition bond financing in determining the electric public utility's
authorized rate of return used to determine the electric public utility's revenue requirement used to set its rates.

New Sec. 4. The electric bills of an electric public utility that has obtained a financing order and caused energy transition bonds to be issued shall comply with the provisions of this section, except the failure of an electric public utility to comply with this section shall not invalidate, impair or otherwise affect any financing order, energy transition property, energy transition charge or energy transition bond. The electric public utility shall:

(a) Explicitly reflect that a portion of the charges on such bill represents energy transition charges approved in a financing order issued to the electric public utility and, if the energy transition property has been transferred to an assignee, such bill shall include a statement to the effect that the assignee is the owner of the rights to the energy transition charges and that the electric public utility or other entity, if applicable, is acting as a collection agent or servicer for the assignee. The tariff applicable to customer shall indicate the energy transition charge and the ownership of the charge; and

(b) include the energy transition charge on each customer's bill as a separate line item and include both the rate and the amount of the charge on each bill.

New Sec. 5. (a) All energy transition property specified in a financing order constitutes an existing, present intangible property right or interest therein, notwithstanding that the imposition and collection of energy transition charges depends on the electric public utility to which the financing order is issued performing its servicing functions relating to the collection of energy transition charges and on future electricity consumption. The property exists:

(1) Regardless of whether revenues or proceeds arising from the property have been billed, have accrued or have been collected; and

(2) notwithstanding the fact that the value or amount of the property is dependent on the future provision of service to customers by the electric public utility or its successors or assignees and the future consumption of electricity by customers.

(b) Energy transition property specified in a financing order shall exist until energy transition bonds issued pursuant to the financing order have been paid in full and all financing costs and other costs of such energy transition bonds have been recovered in full.

(c) All or any portion of energy transition property specified in a financing order issued to an electric public utility may be transferred, sold, conveyed or assigned to a successor or assignee that is wholly owned, directly or indirectly, by the electric public utility and created for the limited purpose of acquiring, owning or administering energy transition property.
property or issuing energy transition bonds under the financing order. All or any portion of energy transition property may be pledged to secure energy transition bonds issued pursuant to the financing order, amounts payable to financing parties and to counterparties under any ancillary agreements and other financing costs. Any transfer, sale, conveyance, assignment, grant of a security interest in or pledge of energy transition property by an electric public utility, or an affiliate of the electric public utility, to an assignee to the extent previously authorized in a financing order shall not require the prior consent and approval of the commission.

(d) If an electric public utility defaults on any required remittance of energy transition charges arising from energy transition property specified in a financing order, a court, upon application by an interested party, and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the revenues arising from the energy transition property to the financing parties or their assignees. Any such financing order shall remain in full force and effect notwithstanding any reorganization, bankruptcy or other insolvency proceedings with respect to the electric public utility or its successors or assignees.

(e) The interest of a transferee, purchaser, acquirer, assignee or pledgee in energy transition property specified in a financing order issued to an electric public utility, and in the revenue and collections arising from that property, is not subject to setoff, counterclaim, surcharge or defense by the electric public utility or any other person or in connection with the reorganization, bankruptcy or other insolvency of the electric public utility or any other entity.

(f) Any successor to an electric public utility, whether pursuant to any reorganization, bankruptcy or other insolvency proceeding or whether pursuant to any merger or acquisition, sale or other business combination, or transfer by operation of law, as a result of electric public utility restructuring or otherwise, shall perform and satisfy all obligations of, and have the same rights under a financing order as, the electric public utility under the financing order in the same manner and to the same extent as the electric public utility, including collecting and paying to the person entitled to receive the revenues, collections, payments or proceeds of the energy transition property. Nothing in this section shall be construed to limit or impair any authority of the commission concerning the transfer or succession of interests of public utilities.

(g) Energy transition bonds shall be nonrecourse to the credit or any assets of the electric public utility other than the energy transition property specified in the financing order and any rights under any ancillary agreement.

New Sec. 6. (a) The creation, perfection and enforcement of any security interest in energy transition property to secure the repayment of
the principal and interest and other amounts payable in respect of energy
transition bonds, amounts payable under any ancillary agreement and other
financing costs are governed by this subsection and not by the provisions
of the code, except as otherwise provided in this section.

(b) A security interest in energy transition property is created, valid
and binding at the latest of the time:

(1) The financing order is issued;
(2) a security agreement is executed and delivered by the debtor
granting such security interest;
(3) the debtor has rights in such energy transition property or the
power to transfer rights in such energy transition property; or
(4) when value is received for the energy transition property.

The description of energy transition property in a security agreement is
sufficient if the description refers to this section and the financing order
creating the energy transition property.

(c) A security interest shall attach as provided in subsection (b)
without physical delivery of collateral or other act and, upon the filing of a
financing statement with the office of the secretary of state, the lien of the
security interest shall be perfected against all parties having claims of any
kind in tort, contract or otherwise against the person granting the security
interest, regardless of whether the parties have notice of the lien. Upon
such filing, a security interest or other transfer of an interest in the energy
transition property shall be perfected against all parties having claims of
any kind, including any judicial lien or other lien creditors or any claims of
the seller or creditors of the seller, and shall have priority over all
competing claims other than any prior perfected security interest,
ownership interest or assignment in the property previously perfected in
accordance with this section.

(d) The secretary of state shall maintain any financing statement filed
to perfect a security interest under this section in the same manner that the
secretary maintains financing statements filed to perfect security interests
in collateral owned by transmitting utilities under the code. The filing of a
financing statement under this section shall be governed by the provisions
regarding the filing of financing statements in the code.

(e) The priority of a security interest in energy transition property is
not affected by the commingling of energy transition charges with other
amounts. A pledgee or secured party shall have a perfected security
interest in the amount of all energy transition charges that are deposited in
any cash or deposit account of the qualifying electric public utility in
which energy transition charges have been commingled with other funds,
and any other security interest that may apply to those funds shall be
terminated when they are transferred to a segregated account for the
assignee or a financing party.
(f) No application of the adjustment mechanism pursuant to section 2, and amendments thereto, shall affect the validity, perfection or priority of a security interest in or transfer of energy transition property.

(g) If a default or termination occurs under the energy transition bonds, the financing parties or their representatives may foreclose on or otherwise enforce such parties' lien and security interest in any energy transition property as if they were secured parties with a perfected and prior lien under the code, and the commission may order amounts arising from energy transition charges be transferred to a separate account for the financing parties' benefit, to which their lien and security interest shall apply. On application by or on behalf of the financing parties, the district court of the county where the electric public utility's headquarters is located shall order the sequestration and payment to them of revenues arising from the energy transition charges.

New Sec. 7. (a) Any sale, assignment or other transfer of energy transition property shall be an absolute transfer and true sale of, and not a pledge of or secured transaction relating to, the seller's right, title and interest in, to and under the energy transition property if the documents governing the transaction expressly state that the transaction is a sale or other absolute transfer other than for federal and state income tax purposes. For all purposes other than federal and state income tax purposes, the parties' characterization of a transaction as a sale of an interest in energy transition property shall be conclusive that the transaction is a true sale and that ownership has passed to the party characterized as the purchaser, regardless of whether the purchaser has possession of any documents evidencing or pertaining to such interest in energy transition property. A transfer of an interest in energy transition property may occur only when:

(1) The financing order creating the energy transition property has become effective;

(2) the documents evidencing the transfer of energy transition property have been executed by the assignor and delivered to the assignee; and

(3) value is received for the energy transition property. After such a transaction, the energy transition property shall not be subject to any claims of the transferor or the transferor's creditors, other than creditors holding a prior security interest in the energy transition property perfected in accordance with section 6, and amendments thereto.

(b) The characterization of the sale, assignment or other transfer as an absolute transfer and true sale and the corresponding characterization of the property interest of the purchaser shall not be affected or impaired by the:

(1) Commingling of funds from energy transition charges with other
amounts;

(2) The retention by the seller of:

(A) A partial or residual interest, including an equity interest, in the energy transition property, whether direct or indirect or whether subordinate or otherwise; or

(B) the right to recover costs associated with taxes, franchise fees or license fees imposed on the collection of energy transition charges;

(3) any recourse that the purchaser may have against the seller;

(4) any indemnification rights, obligations, or repurchase rights made or provided by the seller;

(5) the obligation of the seller to collect energy transition charges on behalf of an assignee;

(6) the transferor acting as the servicer of the energy transition charges or the existence of any contract that authorizes or requires the electric public utility, to the extent that any interest in energy transition property is sold or assigned, to contract with the assignee or any financing party so that the electric public utility will continue to operate the electric public utility system to provide service to the assignee's customers, collect amounts relating to the energy transition charges for the benefit and account of such assignee or financing party, and will account for and remit such amounts to or for the account of such assignee or financing party;

(7) the treatment of the sale, conveyance, assignment, or other transfer for tax, financial reporting, or other purposes;

(8) the granting or providing to bondholders a preferred right to the energy transition property or credit enhancement by the electric public utility or its affiliates with respect to such energy transition bonds; or

(9) any application of the adjustment mechanism as provided in section 2, and amendments thereto.

(c) Any right that an electric public utility has in the energy transition property before its pledge, sale or transfer or any other right created under this section or created in the financing order and assignable under this section or assignable pursuant to a financing order is property in the form of a contract right or a chose in action. Transfer of an interest in energy transition property to an assignee is enforceable only upon the latest of:

(1) The issuance of a financing order;

(2) the assignor having rights in such energy transition property or the power to transfer rights in such energy transition property to an assignee;

(3) the execution and delivery by the assignor of transfer documents in connection with the issuance of energy transition bonds; and

(4) the receipt of value for the energy transition property.

An enforceable transfer of an interest in energy transition property to an assignee is perfected against all third parties, including subsequent judicial or other lien creditors, when a notice of that transfer has been given by the
filing of a financing statement in accordance with section 6, and
amendments thereto. The transfer is perfected against third parties as of the
date of filing.
(d) The secretary of state shall maintain any financing statement filed
to perfect any sale, assignment or transfer of energy transition property
under this section in the same manner that the secretary maintains
financing statements filed to perfect security interest in collateral owned
by transmitting utilities under the code. The filing of any financing
statement under this section shall be governed by the provisions regarding
the filing of financing statements in the code. The filing of such a
financing statement shall be the only method of perfecting a transfer of
energy transition property.
(f) The priority of a security interest in energy transition property
shall not be affected by the commingling of energy transition charges with
other amounts. Any pledgee or secured party shall have a perfected
security interest in the amount of all energy transition charges that are
deposited in any cash or deposit account of the qualifying electric public
utility in which energy transition charges have been commingled with
other funds and any other security interest that may apply to those funds
shall be terminated when they are transferred to a segregated account for
the assignee or a financing party.
(g) No application of the adjustment mechanism as provided in
section 2, and amendments thereto, shall affect the validity, perfection or
priority of a security interest in or transfer of energy transition property.
(h) If a default or termination occurs under the energy transition
bonds, the financing parties or their representatives may foreclose on or
otherwise enforce their lien and security interest in any energy transition
property as if they were secured parties with a perfected and prior lien
under the code. The commission may order amounts arising from energy
transition charges be transferred to a separate account for the financing
parties' benefit, and the lien and security interest shall apply to such
separate account. On application by or on behalf of the financing parties,
the district court of the county where the electric public utility's
headquarters is located shall order the sequestration and payment to them
of revenues arising from the energy transition charges.
New Sec. 8. The description of energy transition property being
transferred to an assignee in a sales agreement, purchase agreement or
other transfer agreement, granted or pledged to a pledgee in a security
agreement, pledge agreement or other security document, or indicated in
any financing statement is only sufficient if such description or indication
refers to the financing order that created the energy transition property and
states that the agreement or financing statement covers all or part of the
property described in the financing order. This section applies to all
purported transfers of, and all purported grants or liens or security interests
in, energy transition property, regardless of whether the related sale
agreement, purchase agreement, other transfer agreement, security
agreement, pledge agreement or other security document was entered into
or any financing statement was filed.

New Sec. 9. All financing statements referenced in this section are
subject to K.S.A. 84-9-501 through K.S.A. 84-9-527, and amendments
thereto, except that, notwithstanding any provision in such sections to the
contrary, such financing statements shall be effective from filing until
formally terminated of record, and no continuation statements need be
filed to maintain the effectiveness of such financing statements.

New Sec. 10. The law governing validity, enforceability, attachment,
perfection, priority and exercise of remedies with respect to the transfer of
an interest or right or the pledge or creation of security interest in any
energy transition property shall be the laws of this state.

New Sec. 11. Neither the state nor any of its political subdivisions,
agencies or instrumentalities shall be liable on any energy transition bonds,
and the bonds shall not be considered a debt or a general obligation of the
state nor any political subdivisions, agencies or instrumentalities, nor shall
they be considered a special obligation or indebtedness of the state or any
state agency or political subdivision. An issue of energy transition bonds
does not, directly, indirectly or contingently, obligate the state, nor any
political subdivisions, agencies or instrumentalities of the state, to levy any
tax or make any appropriation for payment of the energy transition bonds,
other than in their capacity as consumers of electricity. All energy
transition bonds shall contain on the face thereof a statement to the
following effect: "Neither the full faith and credit nor the taxing power of
the State of Kansas is pledged to the payment of the principal of, or
interest on, this bond."

New Sec. 12. The following entities may legally invest any sinking
funds, moneys or other funds in energy transition bonds:

(a) Subject to applicable statutory restrictions on state or local
investment authority, the state, units of local government, political
subdivisions, public bodies and public officers, except for members of the
commission and the commission's technical advisory and other staff, or
board members and employees of the citizens' utility ratepayer board;

(b) banks and bankers, savings and loan associations, credit unions,
trust companies, savings banks and institutions, investment companies,
insurance companies, insurance associations, and other persons carrying
on a banking or insurance business;

(c) personal representatives, guardians, trustees, and other fiduciaries;

(d) all other persons authorized to invest in bonds or other obligations
of a similar nature.

New Sec. 13. (a) The state and its agencies, including the
commission, hereby pledge and agree with bondholders, the owners of the
energy transition property and other financing parties that the state and its
agencies shall not take any action listed in this section. This subsection
does not preclude limitation or alteration if full compensation is made by
law for the full protection of the energy transition charges collected
pursuant to a financing order and of the bondholders and any assignee or
financing party entering into a contract with the electric public utility. The
prohibited actions are as follows:

(1) Altering the provisions of this section that authorize the
commission to create an irrevocable contract right or chose in action by
the issuance of a financing order, to create energy transition property and
to make the energy transition charges imposed by a financing order
irrevocable, binding or nonbypassable charges for all existing and future
retail customers within the service area of the electric public utility;

(2) taking or permitting any action that impairs or would impair the
value of energy transition property or the security for the energy transition
bonds or revises the energy transition costs for which recovery is
authorized;

(3) impairing the rights and remedies of the bondholders, assignees
and other financing parties in any way; or

(4) except for changes made pursuant to the adjustment mechanism
authorized under this section, reducing altering, or impairing energy
transition charges that are to be imposed, billed, charged, collected and
remitted for the benefit of the bondholders, any assignee and any other
financing parties until any and all principal, interest, premium, financing
costs and other fees, expenses or charges incurred and any contracts to be
performed in connection with the related energy transition bonds have
been paid and performed in full.

(b) Any person or entity that issues energy transition bonds may
include the language specified in this section in the energy transition bonds
and related documentation.

(c) An assignee or financing party shall not be considered a public
utility, an electric public utility or person providing electric service by
virtue of engaging in the transactions described in this section.

(d) If there is a conflict between this section and any other law
regarding the attachment, assignment, perfection, effect of perfection or
priority of, assignment or transfer of or security interest in energy
transition property, this section shall govern.

(e) If any provision of this section is held invalid or is invalidated,
superseded, replaced, repealed or expires for any reason, such occurrence
does not affect the validity of any action allowed under this section that is
taken by an electric public utility, an assignee, a financing party, a
collection agent or a party to an ancillary agreement, and any such action
remains in full force and effect with respect to all energy transition bonds
issued or authorized in a financing order issued under this section before
the date that such provision is held invalid or is invalidated, superseded,
replaced, repealed or expires for any reason.

New Sec. 14. An electric public utility has sole discretion to
determine the method in which it expends or invests the proceeds received
from the issuance of energy transition bonds. Nothing in the Kansas grid
resiliency, innovation and dependability act shall be construed to restrict
the ability of the electric public utility from investing the proceeds in
electric infrastructure as the utility deems necessary for it to continue to
meet its obligations of providing reasonably efficient and sufficient service
pursuant to K.S.A. 66-101b, and amendments thereto. If the electric
public utility invests in electric infrastructure, the commission shall review
these investments using its regular processes for consideration and
ratemaking determination of electric infrastructure investments. This
review may take place as part of an application for predetermination filed
pursuant to K.S.A. 66-1239, and amendments thereto, or as part of any
other ratemaking process established by the commission pursuant to.chapter 66 of the Kansas Statutes Annotated, and amendments thereto.

Sec. 15. K.S.A. 66-1239 is hereby amended to read as follows: 66-
1239. (a) As used in this section:
(1) "Commission" means the state corporation commission;
(2) "contract" means a public utility's contract for the purchase of
electric power in the amount of at least $5,000,000 annually;
(3) "generating facility" means any electric generating plant or
improvement to existing generation facilities;
(4) "stake" means a public utility's whole or fractional ownership
share or leasehold or other proprietary interest in a generating facility or
transmission facility;
(5) "public utility" has the meaning provided by K.S.A. 66-104, and
amendments thereto; and
(6) "transmission facility" means:
(A) Any existing line, and supporting structures and equipment, being
upgraded for the transfer of electricity with an operating voltage of 34.5
kilovolts or more of electricity; or
(B) any new line, and supporting structures and equipment, being
constructed for the transfer of electricity with an operating voltage of 230
kilovolts or more of electricity.
(b) (1) Prior to undertaking the construction of, or participation in, a
transmission facility, a public utility may file with the commission a
petition for a determination of the rate-making principles and treatment, as
proposed by the public utility, that will apply to the recovery in wholesale
or retail rates of the cost to be incurred by the public utility to acquire such
public utility's stake in the transmission facility during the expected useful
life of the transmission facility.

(2) The commission shall issue an order setting forth the rate-making
principles and treatment that will be applicable to the public utility's stake
in the transmission facility in all rate-making proceedings on and after
such time as the transmission facility is placed in service or the term of the
contract commences.

(3) The commission in all proceedings in which the cost of the public
utility's stake in the transmission facility is considered shall utilize the rate-
making principles and treatment applicable to the transmission facility.

(4) If the commission fails to issue a determination within 180 days
of the date a petition for a determination of rate-making principles and
treatment is filed, the rate-making principles and treatment proposed by
the petitioning public utility will be deemed to have been approved by the
commission and shall be binding for rate-making purposes during the
useful life of the transmission facility.

(5) If the commission does not have jurisdiction to set wholesale rates
for use of the transmission facility the commission need not consider rate-
making principles and treatment for wholesale rates for the transmission
facility.

(c) (1) Prior to undertaking the construction of, or participation in, a
generating facility or prior to entering into a new contract, a public utility
may file with the commission a petition for a determination of
the rate-making principles and treatment, as proposed by the public
utility, that will apply to:

(A) Recovery in wholesale or retail rates of the cost to be incurred by
the public utility to acquire such public utility's stake in the generating
facility during the expected useful life of the generating facility or the
recovery in rates of the contract during the term thereof; or

(B) Reflection in wholesale or retail rates of the costs to be incurred
and the cost savings to be achieved by the public utility in retiring such
public utility's stake in the generating facility, including, but not limited to,
the reasonableness of such retirement.

(2) Any utility seeking a determination of rate-making principles and
treatment under subsection (c)(1) shall as a part of its filing submit the
following information:

(A) A description of the public utility's conservation measures;

(B) A description of the public utility's demand side management
efforts;

(C) The public utility's ten-year generation and load forecasts; and
(D) a description of all power supply alternatives considered to meet
the public utility's load requirements.

(3) In considering the public utility's supply plan, the commission
may consider if the public utility issued a request for proposal from a wide
audience of participants willing and able to meet the needs identified under
the public utility's generating supply plan, and if the plan selected by the
public utility is reasonable, reliable and efficient.

(4) The commission shall issue an order setting forth the rate-making
principles and treatment that will be applicable to the public utility's stake
in the generating facility or to the contract in all rate-making proceedings
on and after such time as:

(A) The generating facility is placed in service or the term of the
contract commences; or

(B) the generating facility is retired.

(5) The commission in all proceedings in which the cost of the public
utility's stake in the generating facility or the cost of the purchased power
under the contract is considered shall utilize the rate-making principles and
treatment applicable to the generating facility or contract or retired
generating facility.

(6) If the commission fails to issue a determination within 180 days
of the date a petition for a determination of rate-making principles and
treatment is filed, the rate-making principles and treatment proposed by
the petitioning public utility will be deemed to have been approved by the
commission and shall be binding for rate-making purposes during the
useful life of the generating facility or during the term of the contract or
during the period when the cost of the retired generating facility is
reflected in customer rates.

(d) The public utility shall have one year from the effective date of
the determination of the commission to notify the commission whether it
will construct or participate in the construction of the generating or
transmission facility or whether it will perform under terms of the contract.

(e) If the public utility notifies the commission within the one-year
period that the public utility will not construct or participate in the
construction of the generating or transmission facility or that it will not
perform under the terms of the contract, then the determination of rate-
making principles pursuant to subsection (b) or (c) shall be of no further
force or effect, shall have no precedential value in any subsequent
proceeding, and there shall be no adverse presumption applied in any
future proceeding as a result of such notification.

(f) If the public utility notifies the commission under subsection (d)
that it will construct or participate in a generating facility or purchase
power contract and subsequently does not, it will be required to notify the
commission immediately and file an alternative supply plan with the
commission per subsection (c) within 90 days.

Sec. 16. K.S.A. 2020 Supp. 84-9-109 is hereby amended to read as follows: 84-9-109. (a) **General scope of article.** Except as otherwise provided in subsections (c) and (d), this article applies to:

(1) A transaction, regardless of its form, that creates a security interest in personal property or fixtures by contract;

(2) an agricultural lien;

(3) a sale of accounts, chattel paper, payment intangibles, or promissory notes;

(4) a consignment;

(5) a security interest arising under K.S.A. 84-2-401, 84-2-505, subsection (3) of 84-2-711(3) or subsection (5) of 84-2a-508(5), and amendments thereto, as provided in K.S.A. 2020 Supp. 84-9-110, and amendments thereto; and

(6) a security interest arising under K.S.A. 84-4-201 or 84-5-118, and amendments thereto.

(b) **Security interest in secured obligation.** The application of this article to a security interest in a secured obligation is not affected by the fact that the obligation is itself secured by a transaction or interest to which this article does not apply.

(c) **Extent to which article does not apply.** This article does not apply to the extent that:

(1) A statute, regulation, or treaty of the United States preempts this article;

(2) another statute of this state expressly governs the creation, perfection, priority or enforcement of a security interest created by this state or a governmental unit of this state;

(3) a statute of another state, a foreign country, or a governmental unit of another state or a foreign country, other than a statute generally applicable to security interests, expressly governs creation, perfection, priority, or enforcement of a security interest created by the state, country, or governmental unit; or

(4) the rights of a transferee beneficiary or nominated person under a letter of credit are independent and superior under K.S.A. 84-5-114, and amendments thereto.

(d) **Inapplicability of article.** This article does not apply to:

(1) A landlord's lien, other than an agricultural lien;

(2) a statutory lien, or a lien given by statute or other rule of law for services or materials, but K.S.A. 2020 Supp. 84-9-333, and amendments thereto, applies with respect to priority of the lien;

(3) an assignment of a claim for wages, salary, or other compensation of an employee;

(4) a sale of accounts, chattel paper, payment intangibles, or
promissory notes as part of a sale of the business out of which they arose;
(5) an assignment of accounts, chattel paper, payment intangibles, or promissory notes which is for the purpose of collection only;
(6) an assignment of a right to payment under a contract to an assignee that is also obligated to perform under the contract;
(7) an assignment of a single account, payment intangible, or promissory note to an assignee in full or partial satisfaction of a preexisting indebtedness;
(8) a transfer of an interest in or an assignment of a claim under a policy of insurance, other than an assignment by or to a health-care provider of a health-care-insurance receivable and any subsequent assignment of the right to payment, but K.S.A. 2020 Supp. 84-9-315 and 84-9-322, and amendments thereto, apply with respect to proceeds and priorities in proceeds;
(9) an assignment of a right represented by a judgment, other than a judgment taken on a right to payment that was collateral;
(10) a right of recoupment or set-off, but:
(A) K.S.A. 2020 Supp. 84-9-340, and amendments thereto, applies with respect to the effectiveness of rights of recoupment or set-off against deposit accounts; and
(B) K.S.A. 2020 Supp. 84-9-404, and amendments thereto, applies with respect to defenses or claims of an account debtor;
(11) the creation or transfer of an interest in or lien on real property, including a lease or rents thereunder, except to the extent that provision is made for:
(A) Liens on real property in K.S.A. 2020 Supp. 84-9-203 and 84-9-308, and amendments thereto;
(B) fixtures in K.S.A. 2020 Supp. 84-9-334, and amendments thereto;
(C) fixture filings in K.S.A. 2020 Supp. 84-9-501, 84-9-502, 84-9-512, 84-9-516 and 84-9-519, and amendments thereto; and
(D) security agreements covering personal and real property in K.S.A. 2020 Supp. 84-9-604, and amendments thereto;
(12) an assignment of a claim arising in tort, other than a commercial tort claim, but K.S.A. 2020 Supp. 84-9-315 and 84-9-322, and amendments thereto, apply with respect to proceeds and priorities in proceeds;
(13) an assignment of a deposit account in a consumer transaction, but K.S.A. 2020 Supp. 84-9-315 and 84-9-322, and amendments thereto, apply with respect to proceeds and priorities in proceeds;
(14) an assignment of rights in or under:
(A) A claim or right to receive benefits under any workers compensation, industrial accident or similar statute or regulation which provides benefits for occupational injury or illness; or
(B) a deferred payment or benefit arrangement that enables a participant to exclude or defer recognition of income for purposes of federal or state income taxation; or

(15) a transfer by a government—agency or subdivision or agency; or

(16) the creation, perfection, priority or enforcement of any sale, assignment of, pledge of, security interest in or other transfer of any interest in, right or portion of any interest or right in any energy transition property as defined in section 1, and amendments thereto, of the Kansas grid resiliency, innovation and dependability act except as otherwise expressly provided in such act.

Sec. 17. K.S.A. 66-1239 and K.S.A. 2020 Supp. 84-9-109 are hereby repealed.

Sec. 18. This act shall take effect and be in force from and after its publication in the statute book.
