Be it enacted by the Legislature of the State of Kansas:

Section 1. (a) Prior to the construction of any new high-voltage electric transmission line in this state more than five miles from a corporate city boundary, an electric utility shall obtain a right-of-way easement of at least 200 feet in width for the entire length of the proposed high-voltage electric transmission line.

(b) Expenses incurred by an electric utility in furtherance of this act shall be deemed prudent except to the extent such costs are manifestly and unquestionably unreasonable.

(c) The provisions of this act shall apply to the construction of new high-voltage electric transmission lines begun after January 1, 2014.

(d) As used in this section:

(1) "Electric utility" means any public utility, as defined by K.S.A. 66-104, and amendments thereto, which owns, controls, operates or manages any equipment, plant or generating machinery for the production, transmission, delivery or furnishing of electricity or electric power; and

(2) "high-voltage electric transmission line" means any line or extension of a line which is at least five miles in length and which is used for the bulk transfer of electrical power and energy with an operating voltage of 300 kilovolts or higher.

Sec. 2. This act shall take effect and be in force from and after its publication in the statute book.
