

2012 Kansas Statutes

17-4680. Interconnection agreements, requirements. Any agreement between a cooperative organized under the renewable energy electric generation cooperative act and the owner of distribution or transmission lines directly interconnecting with generation facilities of members of such cooperative for use of such lines by the cooperative shall require that all safety, system reliability and other appropriate issues shall have been satisfactorily resolved by the parties prior to the cooperative's first delivery of electricity.

History: L. 2003, ch. 81, § 30; July 1.
