## **MEMORANDUM**

To: Senate Committee on Financial Institutions and Insurance

From: Alan D. Conroy, Executive Director

Date: March 7, 2018

Subject: HB 2448; Moving State Correctional Officers to KP&F

HB 2448 as amended would make the Kansas Department of Corrections an eligible employer and affiliate with the Kansa Police and Firemen's (KP&F) retirement system on January 1, 2019 and any "security officer" who is employed by the Department of Corrections would be enrolled as a KP&F member for all future service. HB 2448 also establishes the definition of "security officer."

For all service time prior to January 1, 2019, members would keep the KPERS benefit that they had earned. The member would able to use their prior years of service for purposes of vesting and retirement eligibility. At retirement, the member would have a single final average salary calculation and would receive a monthly benefit for their KPERS service and a monthly benefit for their KP&F service.

The House Committee on Financial Institutions and Pensions amended the bill by:

- Changing the affiliation date for the Department of Corrections from July 1, 2018 to January 1 2019;
- Updating the job classifications that are included in the bill as "security officers" to reflect more current information; and
- In some cases a member could be eligible to retire under KP&F but not yet met the requirements for KPERS retirement. The Committee amended HB 2448 to allow security officers to retire from KPERS when they are eligible to retire under KP&F.

The House Committee of the Whole made a technical amendment to HB 2448 and passed the bill 113-9.

# Current benefit provisions

Currently, the adult corrections positions are covered in either Corrections Group A (C55) or Corrections Group B (C60). Juvenile corrections positions, to the extent those job classifications still exist, are in regular KPERS.

C55 and C60 use the same benefit formula as regular KPERS (final average salary x years of service x 1.85%) but they have different requirements for normal retirement. For all members since 2009:

- C55 members are eligible for full retirement at age 55 with 10 years of service
- C60 members are eligible for full retirement at age 60 with 10 years of service
- KPERS members are eligible for full retirement at age 65 with 5 years of service or age 60 with 30 years of service.

Because there is no increase in the unfunded actuarial liability but there is additional KP&F payroll, the unfunded actuarial liability (UAL) contribution rate for KP&F declines. The decline in the UAL payment rate is larger than the corresponding increase in the normal cost rate so the net impact is a decline in the KP&F uniform contribution rate from 20.05% to 18.82% for State employers, effective July 1, 2018.

Based on the data provided by the Department of Corrections and using the 12/31/2016 actuarial valuation, HB 2448 is projected to increase employer contributions from the Department of Corrections by \$5.6 million in FY 2019. This increase is partially offset by decrease in the employer contributions at other state KP&F agencies totaling about \$566,000, resulting in a net increase of \$5.0 million in KP&F employer contributions from state agencies in FY 2019. This reflects the full fiscal year cost estimate for the state. With a January 1, 2019 effective date, the cost would be approximately half of the cost study estimate, or about \$2.5 million for FY 2019.

The decline in the uniform rate also affect local KP&F employers. The uniform rate local employers would affect CY 2019 and would reduce the local KP&F employer contribution rate from 22.13% to 20.51%. Applied to the project KP&F payroll for CY 2019, the differential totals about \$7.9 million less in total local KP&F contributions.

After the transfer, no further contributions to KPERS would be made on behalf of the Corrections employees covered by KP&F. However, vested KPERS members who transfer to KP&F would remain eligible for a KPERS benefit based on the service accrued prior to the transfer. The transfer of the Corrections members to KP&F has a very small impact on the KPERS State unfunded actuarial liability (a decrease of around \$17 million). Therefore, any residual unfunded actuarial liability in KPERS for the transfer group will remain in KPERS, and the costs of amortizing any unfunded actuarial liability for that group would be spread over the remaining KPERS State payroll. Since the total covered payroll of the State/School group declines by 2.2% as a result of the transfer, the State/School actuarial contribution rate increases by 0.22%. While the contribution rate for KPERS state agency employers may increase by 0.22%, the rate would apply to a lower total State payroll, which results in a minimal difference in the total State contributions to KPERS. However, because of the statutory contribution rate cap, any increase would not be reflected in employer contributions immediately.

I would be happy to respond to any questions the Committee may have regarding HB 2448.

Attachment

All of these groups have a 6% employee contribution rate and the employer contributes the State/School rate (14.41% in FY 2019).

### KP&F benefits

KP&F is similar to KPERS in basic plan design structure, but many of the plan design elements are different.

- The benefit formula is the same, but the final average salary is calculated differently and the multiplier is 2.5% instead of 1.85%.
- Employee contributions are slightly higher in KP&F at 7.15%
- The employer contribution rate is the full actuarial rate (20.56% in FY 2019). The vesting requirement for KP&F is 15 years of service.
- Normal retirement for KP&F is age 50 with 25 years of service, age 55 with 20 years of service, or age 60 with 15 years of service.

Because of the higher multiplier, the KP&F plan design will yield a higher benefit than KPERS or KPERS Correctional. KP&F also has a vesting period that is three times longer than KPERS. As an example, if a person works a 30-year career and has a final average salary of \$40,000, their maximum annual is very different:

	KPERS Member	KP&F Member
Final average salary	\$40,000	\$40,000
Service	30 years	30 years
Benefit	\$22,200 per year	\$30,000 per year
Replacement percentage of final average salary	55.5%	75,0%

A more detailed comparison of KPERS, KPERS Correctional and KP&F is attached to this memorandum.

### **Actuarial costs**

KPERS' consulting actuary completed a cost study using data provided by the Department of Corrections to estimate the actuarial cost and employer contributions if those members are moved to KP&F.

Moving this group of Corrections employees to KP&F for future service increases the overall KP&F normal cost rate due to the entry age of the Corrections employees in the group (their current attained age). However, as new hires replace current Corrections employees, the normal cost rate is expected to gradually decline. Since the Corrections employees are moving to KP&F for future service only, there is no increase in the unfunded actuarial liability for KP&F.
