Re: HB 2601

Dear Education Committee Members,

Please do not support mandated vaccines. Many children cannot or should not be vaccinated due to other health issues. In addition, big pharma keeps shutting down new research that would show new data in addition to the existing data that shows they are unsafe.

Do. Not. Support.

No excuses.

If they are so safe, take some extra shots in the arm of flu, tdap, etc etc and see if it harms you.

Thanks
