Re: HB 2601

Dear Chairman Huebert,

I am writing today to ask for you to support the bill, HB 2601.

Having the medical freedom to choose medical procedures necessary to have a free society. I am a mother of small children and my first son has mild vaccine injury. Im thankful that it's not as bad as it could have been. I think reading and asking the right questions early on. Lead me to stop vaccinating and ultimately saved my son's life and health. I hope that you read this with an open heart and mind and consider how important this issue is.
