Re: HB 2601

Dear Chairman Heubert,

Our country was found on principles of freedom. Freedom from taxation, freedom from tyranny and freedom from persecution.

I can think of nothing that is less free then forced medical procedures. Please vote to protect our right as parents to CHOOSE medical procedures for our children. We need to keep religious exemptions and it would be even better if philosophical exemptions were allowed for vaccinations.

Currently we have a vaccination system that is corrupted by coercion and money. There is no way to hold a vaccine manufacture responsible for an injury. To date the unbiased safety studies have not been done as required when the VAERS system was enacted. Please vote for freedom and allow vaccine exemptions!

Sincerely,
Holly Menning
Gardner, KS
