Re: HB 2601

Dear Chairman Heubert,

I've come to believe that God designed us with a perfect and beautiful immune system, and it is a sin to mutilate His creation by injecting toxins into it. That being said, I didn't always realize that vaccines went against God's plan. I am a mother of 11 children. Half have been vaccinated (the older ones).

The younger ones have never been vaccinated and are FAR healthier than their older siblings. My unvaccinated children were easy babies who rarely cried. My older (vaccinated) ones cried often.

Comparing my vaccinated children to my unvaccinated children is like night and day. They are completely different in all ways....mentally, emotionally, spiritually, behaviorally, etc. I have a 16yr old boy who was nearly killed by a set of vaccines as a toddler. He now struggles with Autism. He was NOT Autistic until directly after those shots.

I also witnessed my healthy 12yr old (now 22) go into a seizure only minutes after his varicella booster. In my personal experience vaccines have caused only hurt and I see absolutely nothing good in them whatsoever. I also see this in other people's children. I have been bullied for my stance on vaccines and for trying to protect my children from further harm.

I have had a doctor refuse to see my children due to not allowing vaccines. This was a doctor who signed medical exemptions for several years, then suddenly refused. This is only the tip of the iceberg. I could write a book on the bad experiences we've had with shots, but I'll stop here.

I fear for my children's lives. I don't vaccinate because I want what's best for them. I LOVE them.

Thank you for your time,  
Tanya from Wellington KS
