

Re: HB 2601

2/10/20

Dear Education Committee Members,

My name is Catherine and I have two extremely healthy unvaccinated daughters. As a citizen of this great country and of the state of Kansas, I value freedom above most anything. The freedom to choose what you put in your body, or that of your children should never be challenged.

Now, I have MANY peers that choose to vaccinate (which is their right) and several who do not. I can tell you that the ones who choose to vaccinate have chronically ill children with severe allergies and auto immune conditions. They are no strangers to the ER and believe this is totally normal. Where my friends who choose to not vaccinate their children, are healthy many times over.

The enormous cost of auto immune conditions that children now have at it's current rate will bankrupt our state, and even our country.

We want HEALTH FREEDOM and we are not few and far between like you may believe.
