

Dear Kansas House Transportation Committee,

I am writing in regards to the antique tag bill, and would love to see it revised to be more inclusive. I have an antique car myself that is all original, but I am needing to change some parts out that are not available OEM anymore. I believe it is impossible to keep 100% of antiques OEM due to the scarcity of original equipment parts. I have not finished my restoration exactly for the reason above. I am hoping this modification will be approved to allow more of us antique owners to fully enjoy our vehicles on the road.

Thank you for your time and consideration

Justin Bjork
