In support of SB 212

Chairman Hilderbrand and Members of the Senate Public Health and Welfare Committee,

I would like to express my support for SB 212 scheduled for a hearing March 22nd, and my desire that our Senate Public Health and Welfare Committee members would support this bill, SB 212. I don't believe it's wise to have sole authority given to the KDHE Secretary of Health to add any additional vaccines to childhood schedules. It's not something I support and do not think something this important to the health of our children should be in the hands of a single, unelected, biased official! It should at least be up to the collective body of our elected legislators. This is a very important issue to all of us parents and I am hopeful that you will consider this bill very seriously and support it. Thank you for your time.

Regards,

L. Dremann
