I am concerned that adding another vaccine to our children's vaccine list is not a positive step forward. The covid vaccine has had little research. Children are not as likely to be ill from Covid. My family and I do not support vaccines for our children when little research has been done. Also our religious beliefs do not support vaccines that have fetal tissue or cells used in the making of them. Please do not allow the KDHE to single-handedly manage the vaccine schedule.

Thank you for your time listening to my concerns.

LeAnna Soehner
