In support of SB 212

Chairman Hilderbrand and Members of the Senate Public Health and Welfare Committee,

My vaccine injury story is typical for many people. The vaccine injury that is immediate and dramatic is not as common as the injuries that slowly build up in a child's body. I have 3 vaccine injured children. We have spent thousands of dollars and many countless hours trying to rid and reverse the damage from the adjuvants in the vaccines and from the harmful immune system responses. I did not make the connection between their injuries and the vaccines until two doctors suggested I hold off or delay the vaccines for my younger children. Please help to return health decisions to families and their doctors by supporting this bill to take the control out of the hands of the KDHE's Secretary of Health.
