This is not the place to put up barriers to wind energy! Rural Kansans, all Kansans, and I, deserve better!

I want clean water and better air to breathe. I want clean renewable energy. I want the leases and revenues that come with wind energy to support rural Kansas. I want a cleaner and better future. And I'm going to be pissed off if the Kansas Senate doesn't take care of me and all the families in rural Kansas that would benefit from wind energy.

I don't want pollution. I don't want laws and regulations on wind power or renewables. I don't want toxins coming out of holes in the ground. I don't want smokestacks in the air. I don't want earthquakes from injecting the earth with pollution. I've had enough. I've had too much of it. NO MORE!

VOTE NO on SB 279

There's a better future ahead with wind and renewable energy bringing income and jobs to Kansas. So if you don't want to get run over, get out of the way. Stop the ridiculous regulations on wind energy. Get on board with the climate change program, or get voted out of office. Myself, and a whole lot of younger folks take the future very seriously. Stay out of our way.

Please, don't mess with what's best for Kansas, and what's best for our future.
