#### Program Goals

A. To effectively manage, protect, and administer the state's parks, its visitors, and associated wildlife efficiently, while providing a diversity

of quality outdoor recreation experiences with special regards toward natural resource protection.

B. To promote Kansas' quality outdoor recreation activities and quality of life experiences.

C. To enhance the public's knowledge of the importance of outdoor recreation to the Kansas economy.

#### Program History

In 1955, the Kansas Legislature adopted a public policy providing for state parks and facilities by creating the Kansas Parks and Resources Authority. In 1958, they appropriated funds for operations and created Kanopolis State Park. Additional parks were added legislatively by statute as years passed, and in 1987 Governor Mike Hayden merged the Kansas Parks and Resources Authority and the Kansas Fish and Game Commission into the Kansas Department of Wildlife and Parks. Governor Sam Brownback added Tourism to the Department in 2011. The Parks Division is responsible management and operations of 28 designated state parks, including Little Jerusalem Badlands State Park and Flint Hills Trail State Park. These areas include 8,000 acres of maintained lawn grass, 32,200 acres of park-land resources, over 510 miles of trails, over 280 miles of roads, more than 10,000 campsites, 35,000 acres of recreational surface water, over 1,000 structures; complete sewer systems including 81 lagoons, over 160 lift stations with 2 pumps each and treatment plants; 24 potable water systems, and more than 3,000 miles of utility lines. The Division expects over 7 million visitors this year. On average, each employee is responsible for 74,000 visitors annually. A major effort is placed on public safety, law enforcement and providing a family atmosphere where children and adults can have an enjoyable, safe experience. Over 220 special events are provided annually that enhance quality-of-life experiences for our visitors and generate significant economic impact for surrounding communities and the state.

# **Fisheries**

# **Consequences of Not Funding this Program**

A dramatic reduction of fishing opportunity in Kansas. Jeopardize the fate of an estimated 400,000 anglers that spend approximately \$295 million dollars in Kansas each year. A predictable loss of sport fish that experience poor natural recruitment on their own due to degradation of habitat. Further degradation of habitat due to lack of manpower and funding to mitigate these issues. Loss of human respect and stewardship of our natural resources and heritage.

|         | Statutory Basis      | Mandatory vs.<br>Discretionary | MOE/Match<br>Rqt. | Priority<br>Level |

# **Program Goals**

A. The Fisheries Division goals are to Conserve Kansas sport, non-sport, and threatened and endangered fishes, the water they rely on, and their habitats.

B. Increase fishing opportunity. Increase fishing success.

C. Market our fisheries programs. Fully support, mentor, and reward the dedicated staff.

# **Program History**

The Fisheries Division is responsible for maintaining and creating fishing opportunity and improving fishing quality across the state. It is also responsible for conserving and enhancing fisheries resources. Fisheries Division programs are tailored to meet the special needs of anglers. For example, the Urban Fishing Program provides fishing in areas where demand for fish exceeds supply by stocking catchable size fish throughout the fishing season. On the other end of the spectrum is the lack of public water in western counties. The Department's private water leasing program is designed to create new fishing opportunities in portions of the state that are under served. The fisheries program strives to respond to the needs of all anglers regardless of their location.

Kansas waters hosted an estimated 400,000 anglers for 4,694,000 fishing trips according to the 2011 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation (conducted every five years by the US Census Bureau). Because of its widespread popularity, recreational fishing is an important industry in Kansas. Anglers in Kansas spend over \$295 million each year.

The organizational sections of the fisheries Division are Management, Research, and Fish Culture. These sections work hand-inhand to improve fishing in Kansas, protect the aquatic environment, and to educate the public on matters relating to aquatic life. The fisheries program is multifaceted, working with the fish habitat, the fish themselves, and the public who benefits from these precious natural resources

### **Public Lands**

#### **Consequences of Not Funding this Program**

Loss of habitat, loss of diversity, reduction in stable wildlife populations. Decline in outdoor recreation participation by public. Outdoor activities have been shown to have physical and mental health benefits and promote community interaction and resource appreciation. Negative socio-economic impact both at a local and statewide level due to low hunting/fishing participation, resource visitation, and reduced spending at associated industries.

Priority Level

**Program Goals** 

A. To Optimize public access for hunters, anglers, and other compatible recreational opportunities; Conserve, manage, and optimize wildlife and their habitats

B. Provide appropriate infrastructure to support hunting, fishing, and other compatible recreational opportunities

C. Provide public health and safety for all public lands users through pro-active management and law enforcement

#### **Program History**

In 1926 the first state fishing lakes were constructed at Neosho and Meade. The first public land acquisition occurred in 1939 for the Finney Game Refuge utilizing Pittman-Robertson federal aid funds. In 1942, acquisition of land for public hunting access began at Cheyenne Bottoms Wildlife Area. This was the beggining of public access areas for hunting and fishing in the State of Kansas. The Public Land Division is responsible for the management of 412,000 acres of public land and water; this represents approximately one percent of the land base of Kansas. The primary responsibility is to provide a multitude of diverse habitats for wildlife species of Kansas. The public lands program is funded solely by the Wildlife Fee Fund and revenue generated from management activities that benefit wildlife. Ninety percent of all hunters and fishermen in Kansas will spend part of their hunting and fishing activities, on public land or water within any one year. The heavy use by hunters and fishermen requires safe and sanitary facilities on wildlife areas and state fishing lakes. The Public Lands program is responsible for the management of 129 projects. These projects are funded from the Wildlife Fee Fund and some are included in the U.S. Fish and Wildlife Service Sport Fish and Wildlife Restoration Programs that reimburses up to 75 percent of approved activities designed to benefit fish and wildlife and hunters and anglers. These properties annually receive approximately four million plus, visitation-days by hunters, anglers and wildlife viewers. Vehicles and equipment will be replaced according to replacement schedules and need. Upgrades will be examined on overall benefit and effectiveness to enhance operations and safety. Temporary and seasonal employees will supplement the work loads placed on FTE's, during heavy use periods and activities that require assistance. Operations and maintenance expenditures are adequate to maintain minimal standards, and replace some worn-out equipment.

Besides Wildlife Fee Funds, the Public Lands Division contracts agricultural activities on land licensed from the Corps of Engineers, Bureau of Reclamation and state lands. Revenue generated from these activities is placed in separate unlimited accounts for each area. Federal landowners require revenue be returned to the area within five years for wildlife benefit. Approximately \$2,000,000 is generated and expended annually from these funds which are (unlimited) and are not a stable source of income.

**Program Goals** 

A. Provide public health & saftety for all public lands users through pro-active management and law enforcement В. С

Program History
The Law Enforcement Division is responsible for the statewide enforcement of state and federal fish and wildlife laws, boating laws, and public lands regulations. These enforcement activities occur on private and publicly owned lands within the state. In addition to these primary law enforcement duties, these officers also assist federal, state and local law enforcement agencies in a support role when requested. Their assistance is provided for warrant service and arrest of wanted fugitives, enforcement of controlled substance laws, and response to emergency management. The Division also plays an active role in providing information and educational programs concerning hunter education, boating safety, and other natural resources related programs.

### **Consequences of Not Funding this Program**

Loss of habitat, loss of diversity, reduction in stable wildlife populations. Decline in outdoor recreation participation by public. Outdoor activities have been shown to have physical and mental health benefits and promote community interaction and resource appreciation. Negative socio-economic impact both at a local and statewide level due to low hunting/fishing participation, resource visitation, and reduced spending at associated industries.

Statutory Basis 32-801,32-802,32-805

General

Mandatory vs. Discretionary Mandatory

MOE/Match Rqt. No

Priority Level 6

### Program Goals

A. To monitor wildlife populations and their habitats, and to assess public appreciation, demand and tolerance for wildlife resources and B. Provide programs designed to conserve, protect and enhance wildlife habitat.

C. Provide wildlife related recreational opportunity.

#### **Program History**

The Wildlife Division includes research and surveys, and management. Wildlife Division projects are funded from the wildlife fee fund. Most projects qualify for 75 percent reimbursement through the U.S. Fish and Wildlife Service federal aid to Wildlife Restoration Program. The research and survey program provides projects that measure trends in big game, upland game birds, migratory game birds, and furbearers. Harvest, hunter success and human dimensions information are obtained from hunter surveys. Information provides the basis for objective administration of seasons, permit quotas, regulations and management program planning. Research targeting specific wildlife management problems or environmental issues are accomplished within this section. Contracting for professional services is the primary means for accomplishing research objectives. The wildlife management program provides for a statewide initiative to improve upland game populations by improving upland game habitat. The walk-in-hunting-access program (WIHA) designed to lease private land for public hunting access is coordinated by management personnel. Other operations include assistance to public land management, agricultural liaison, animal damage control, species reintroduction, animal rehabilitation, and interaction with other governmental and private organizations concerning wildlife management.

### Education

### Consequences of Not Funding this Program

The consequenses of not funding this program include the loss of long standing and integral education programs such as hunter education and outdoor skills workshops, as well as the five nature and wildlife education centers in Kansas.

| Statutory Basis |                               | Mandatory vs. | MOE/Match Rgt. | Priority |
|-----------------|-------------------------------|---------------|----------------|----------|
|                 | Statutory Dasis               | Discretionary | moenmatch requ | Level    |
| General         | 32-801,32-802,32-805          | Mandatory     | No             | 7        |
| Specific        | 32-920 - 924, 32-912 -<br>914 | Mandatory     | No             | 7        |
| Specific        | 32-1139 - 1143                | Mandatory     | No             | 7        |

#### Program Goals

A. Connect people to the KDWP mission through strategies to engage with and support customers with broad experiences and backgrounds as they participate in and enjoy the outdoor opportunities of Kansas.

B. To produce safe, knowledgeable, responsible and legal hunters and furharvesters who will support wildlife management strategies that produce healthy populations of wildlife for the enjoyment of the people of Kansas, and to assist all individuals in developing awareness, knowledge, skills and commitment to result in safe, responsible behavior and actions concerning the use of Kansas' wildlife resources.

C. Inspire life-long learning through outdoor skills programs and outreach efforts designed to enhance the knowledge, understanding and appreciation of Kansas' natural resources.

#### Program History

Nearing a 50 year anniversary and one of the most successful outdoor education programs delivered by the Kansas Department of Wildlife and Parks, the Hunter Education program was created in 1973 and owes this success to the dedicated Kansas hunter education instructors that teach this program. The program funding is made possible through the excise taxes collected on hunting and shooting equipment (Pittman Robertson Act) which pays for classroom materials and training equipment. The Pratt Education Center was converted from the first fish culture school of Kansas University, built in 1913, into the agency's first nature center, established in 1966. Located in the Flint Hills, the Milford Nature Center was built adjacent to the Milford fish hatchery and opened its doors in 1991. The Great Plains Nature Center, the result of a partnership between KDWP, the friends of the Great Plains Nature Center, the US Fish and Wildlife Service and the City of Wichita, opened its doors in 1996. The Kansas Wetlands Education Center, a partnership between KDWP and Fort Hays State University, opened in 2009. In 2013, KDWP took over operations of the Southeast Kansas Nature Center through a lease agreement with the city of Galena.

Output Maggurog

# **Ecological Services**

#### **Consequences of Not Funding this Program**

Negative impacts to critical habitats for state listed threatened and endangered species could cause additional decline in population levels that could cause extirpation of the species from the state. Without the review and permitting process for impacts to wildlife additional species could be added to the Federal endangered species list and thus removing jurisdiction from state to federal authority. Part of this reviews includes reviews all KDWP grants for compliance and non-compliance with state and federal laws (Section 7 consultation and NEPA) which without this measure could result in the loss of federal funding for conservation programs agency wide. These reviews are completed in house to reduce cost for the agency that may be required to conduct environmental assessments for each grant funded project causing increased cost per project. Administration of the Section 6 Cooperative Agreement with US Fish and Willdife Service is also within the sections duties and without this agreement being maintained each year the state wildlife agency would be in further non compliance with the Federal ESA.

|         | Statutory Basis        | Mandatory vs.<br>Discretionary | MOE/Match<br>Rqt. | Priority<br>Level |

#### **Program Goals**

A. Conduct project reviews for activities that impact fish and wildlife resources. Reviews are conducted on projects carried out by private individuals, industry, local,, state and federal governments as allowed under statute and regulations.

B. To help conserve sensitive or imperiled fish and wildlife species as determined by the State Wildlife Action Plan (SWAP). This includes efforts to recover the most at risk species in the state.

C. Develop and implement recovery plans for all species listed as in need of conservation, threatened, or endangered in the state of Kansas.

#### **Program History**

The Ecological Services Section was established in 1987 during the reorganization of Fish and Game Commission and the Parks Resource Authority to one department. The section was developed to provide technical input to many agricultural and nonagricultural related projects. The addition of both federal and state environmental protection laws such as the National Environmental Policy Acts and federal Clean Water laws and regulations mandated that KDWP become more actively involved as the voice of the state's wildlife resources. The passing of the federal Endangered Species Act of 1973 and subsequent passing of the Kansas Nongame and Endangered Species Act in 1975 mandated additional KDWP involvement with project reviews and the development of the nongame. threatened and endangered species program in the state. Subsequent state laws (Water Project Environmental Coordination Act K.S.A. 82a-325 to 327) requires review of water projects in the state and their impacts to other natural resources including threatened and endangered species. In 2005, Ecological Services Section developed the first State Wildlife Action Plan, a plan developed to keep common species common by conserving wildlife and habitat before they become to rare and costly to restore. Through this process a list of species of greatest conservation need was developed and is the cornerstone to receiving federally funding from the State Wildlife Grants Program. The Ecological Services Section is responsible for programs related to non-game, threatened and endangered species, biodiversity, watchable wildlife, climate change (including alternative energy development), and private lands management. The section is responsible for administering State Wildlife Grants (both appropriated and competitive grant funds), Section 6 cooperative agreement and grants, Cooperative Service Agreements with the USFWS and the Chickadee Checkoff Program. The section is also responsible for upholding the threatened and endangered species project review program pursuant to the Kansas Nongame and Endangered Species Ad of 1975. In addition, the section is responsible for addressing a diverse array of wildlife interest ranging from T&E to watchable wildlife. Programmatic objectives involve developing collaborative partnerships and committees (e.g. Kansas Nongame Advisory Council, T&E Task Force, Teaming With Wildlife)as well as the development and implementation of the State Wildlife Action Plan (SWAP)
