# History of the SIA Program

---

As part of lifting the Moratorium plan at Osawatomie State Hospital (OSH), KDADS developed a new provider type, State Institutional Alternative (SIA).

SIA providers expand the number of regional psychiatric hospital beds to serve individuals with mental illness meeting the criteria for state hospital admission.

SIAs provide regional alternatives to Larned State Hospital (LSH) and OSH, allowing for care closer to home for patients and reducing demand on the state hospitals, as well as reducing wait times for admissions.

SIA providers can bill Medicaid for those patients with KanCare coverage and KDADS provides funding for uninsured patients through HealthSource Integrated Solutions.

Using the SIA providers has led to revisions to the standard screening form, standardization of medical clearance information needed for admission, and improved reporting through a central bed board to show inpatient space availability across state hospitals and community hospitals with inpatient psychiatric capacity.
