Date

MINUTES OF THE HOUSE APPROPRIATIONS COMMITTEE

The meeting was called to order by Chairman Kevin Yoder at 9:05 a.m. on January 21, 2010, in Room 346-S of the Capitol.

All members were present except:

Representative Owen Donohoe- excused Representative Kasha Kelley- excused

Committee staff present:

Nobuko Folmsbee, Office of the Revisor of Statutes Alan Conroy, Kansas Legislative Research Department Heather O'Hara, Kansas Legislative Research Department Jonathan Tang, Kansas Legislative Research Department Kathy Holscher, Committee Assistant, Appropriations Committee

Others attending:

See attached list.

Attachment 1 Kansas Department of Commerce Agency Overview for FY 2009

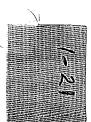

Attachment 2 Kansas Policy Institute

Attachment 3 Association of School Boards

Steve Kelly, Deputy Secretary for Business, Kansas Department of Commerce, presented an agency overview for FY 2009, (Attachment 1). He reviewed revenue sources and stated that over 70% of the agency's expenditures provide grants and other assistance to individuals, businesses and communities. Priority economic industries were identified as advanced manufacturing, agriculture, bioscience, energy and professional services. Workforce services administered \$18.4 million to address various labor-related issues, Rural Development administered two new federal programs and high-speed internet for under served areas in rural Kansas through the federal stimulus dollars. He stated that business development for FY 2009 involved expansions resulting in job retention and \$1 billion in capital investments. There were 43 recruitment projects which were in competition with out-of-state locations. Deputy Secretary Kelly stated that an award of \$264,000 in Value Added Grants/Loans has generated \$128 million in sales, new agritourism vendors, and a total of 19 wineries have been established. Record-high export totals were recognized in FY 2009, and new programs to attract travel and tourism were implemented, he noted. Economic development opportunities remain a priority in order to expand job opportunities, Deputy Secretary Kelly stated.

Deputy Secretary Kelly responded to questions from committee members in regards to staffing issues and job growth. He reported that there were some layoffs in FY 2009, which resulted in shifting programs to Network Kansas. As requested by committee members, additional information will be provided in regards to budget reductions, stimulus funding and the impact on staffing; potential revenues and incentives for filming opportunities; locations of Kansas wineries and state revenues, Deputy Secretary Kelly stated. He reviewed the Kansas Economic Opportunity Initiative Fund, which assists businesses with capital expenditures; the High Performance Initative Program which is based on capital investments and provides a 10% income tax credit for qualifying companies with above average wages; as well as other incentive packages. Discussion also included the location of regional offices.

Dave Trabert, President, Kansas Policy Institute, presented a budget analysis to the committee, (Attachment 2). He stated that harmful tax increases could be avoided if broad efficiency studies were implemented and if a small portion of cash reserves were used. This could position Kansas for economic recovery as a strong competitor for future job growth. He stated that tax receipts did not negatively impact the current budget situation, but was due to state expenditures. He reviewed tax exemptions and the rational for not increasing taxes. Based on potential revenues, schools could reduce spending and still produce the same outcomes through efficiency audits. President Trabert stated that a \$6 million potential savings could be realized if a median cost per pupil spending within similar sized districts was established. He noted areas within the government that could be more efficient within the budgeting process through efficiency studies, an improved budget process, and priority-based budgeting. President Trabert stated that the use of carry over cash reserves could be used in the short-term to balance budget challenges.

CONTINUATION SHEET

Minutes of the House Appropriations Committee at 9:10 a.m. on January 21, 2010, in Room 346-S of the Capitol.

President Trabert responded to questions from committee members. As requested, he will provide the committee with additional information on states using priority-based budgeting. He noted that drawing conclusions based on ending fund balances will vary on a fund-to-fund basis. Through efficiency studies school districts should be able to determine what funding is actually needed as opposed to projections, after which time funding formulas could be determined, he added.

Mark Tallman, Assistant Executive Director/Advocacy, Kansas Association of School Boards presented information for the committee's consideration, (Attachment 3). He reviewed cash balances and budgeted expenditures for FY 2009 and FY 2010, and noted that the Kansas Senate encouraged school districts to increase reserves in order to address budgeting shortfalls. School budgets are calculated on base aid per pupil, which is established by the Legislature, and values and priorities on where to allocate these funds are determined by local school boards, he added. The Post Audit Report, at a cost of over \$1 million to the state, was used to determine what the cost is to meet state requirements. The suggestion for schools to be more efficient was not to spend less money, but to obtain the same results by freeing up dollars for improvement.

Mr. Tallman responded to questions from committee members in regards to school resources. He stated that schools have experienced funding increases over the years with expectations determined by Post Audit. These expectations included the cost to increase student achievement in order to meet state reading and writing standards and state curriculum requirements. Suggestions to determine the cost of educating students included establishing the framework for comparison, i.e., outcomes from other states, number of teachers, salaries, class size and curriculum. Block versus traditional scheduling and the impact on planning time for teachers was also discussed.

The next meeting is scheduled for January 25, 2010.

The meeting was adjourned at 10:59 a.m.

DEPARTMENT OF COMMERCE

Agency Overview Fiscal Year 2009

House Appropriations Committee By Steve Kelly, Deputy Secretary of Business Development Kansas Department of Commerce January 21, 2010

Mission Statement

To deliver the highest level of business development, workforce and marketing services to build a healthy and expanding Kansas economy.

2

Divisions

Business Development

Rural Development

- Agriculture Marketing Development
- Community Development
- Office of Rural Opportunity

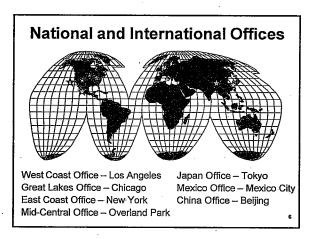

Trade Development

Travel & Tourism

Workforce Services

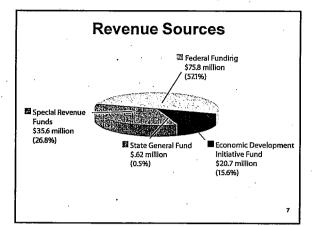

Commissions and Offices

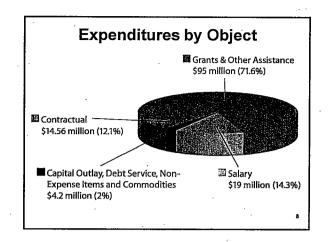

- Kansas Athletic Commission
- Kansas Commission on Disability Concerns
- Kansas Film Commission
- Office of Minority and Women Business Development

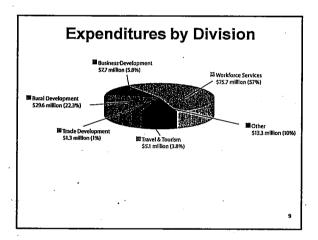

Appropriations Committee
Date 1-21-10
Attachment 1-1

Priority Economic Industries

The Department works to grow all sectors of the economy, with a focus on the following sectors:

- -Advanced Manufacturing (aviation, etc.)
- -Agriculture
- Bioscience (animal science, pharmaceuticals, etc.)
- Energy (traditional and renewable sources)
- Professional Services

10

Federal Stimulus Act Activities

The Department assumed new duties this year as required by the American Reinvestment and Recovery Act:

- Workforce Services administered an extra \$18.4 million to address various labor-related issues.
- Rural Development administered two new federal programs – the Neighborhood Stabilization Program and the CDBG-R Program – to help communities hit hardest by the housing crisis.
- Rural Development Division began Connect Kansas, an initiative to bring high-speed Internet to underserved areas in rural Kansas.

Business Development

Goal:

 To encourage job creation and capital investment in Kansas through the recruitment of out-of-state firms, the expansion of existing Kansas companies and the creation of new companies.

Products and services:

- Direct financial incentives, including various tax credits and low-interest loans
- Site location consultation and cost-benefit analysis
- Assistance in working with State regulatory agencies and local community organizations

Business Development

Fiscal Year 2009 highlights:

- Involved in 43 recruitment projects in which Kansas was competing with out-of-state locations.
- Major new recruitment successes include:
 - Johnson Controls (Wichita)
 - Siemens (Hutchinson)
 - Garmin (Olathe)
 - Black & Veatch (Overland Park)

13

Business Development

Fiscal Year 2009 highlights (continued):

- Involved in 150 expansions of existing Kansas companies. These projects resulted in:
 - -3,921 retained jobs at \$16.38 per hour
 - \$1 billion in capital investment
- Major expansions include:
 - Goodyear (Topeka)
 - Gates Corporation (Iola)
 - Deluxe Corporation (Lenexa)
 - Systemair Manufacturing (Lenexa)
 - Neodesha Plastics (Neodesha)

14

Business Development

- Fiscal Year 2009 Media Accolades:
- CNBC ranks Kansas No. 7 for business (July '09)
- Business Facilities magazine ranks Kansas No. 9 for biotechnology (July '09)
- Pollina names Kansas a Top 10 state for business (June '09)
- Trade & Industry Development ranks two Kansas projects among nation's best (March '09)
- **Area Development** awards Kansas third straight Silver Shovel (May '08)
- Site Selection names Kansas a Top 10 state for capital investment (May '08)

Rural Development

Goal:

- To elevate the focus on rural development and encourage collaboration among rural groups.

Sub-Divisions:

- Agriculture Marketing
- Community Development
- Office of Rural Opportunity

Programs and services:

- Simply Kansas
- Agritourism development
- Value Added Loan
- Main Street
- CDBG programs
- -And others...

16

Rural Development: Agriculture Marketing

Goal:

 To enhance the value of Kansas agriculture products through new uses and marketing, providing greater returns to Kansas producers and rural communities.

Programs and services:

- Simply Kansas trademark program
- International trade assistance
- Value Added Loan program
- Agritourism assistance

Rural Development: Agriculture Marketing

Fiscal Year 2009 highlights:

- Fully staffed the Office of Rural Opportunity.
- Awarded \$264,600 in Value Added Grants/Loans to eight groups, which totaled \$128 million in sales.
- Registered dozens of new agritourism vendors, bringing the total number to 274.
- Assisted in the establishment of four wineries, bringing the total number of wineries to 19.
- Registered more than 100 new members in the Simply Kansas trademark program.

Rural Development: Agriculture Marketing

Fiscal Year 2009 highlights (continued):

- Continued to facilitate the development of renewable energy production facilities throughout Kansas. By year's end, Kansas had:
 - Eleven ethanol plants combining for 495 million gallons in total annual output
 - Two biodiesel production facilities with an annual output of 6.2 million gallons

19

Rural Development: Community Development

Goal:

 To preserve and enhance the quality of life in Kansas communities by increasing their capacity to meet development and revitalization needs.

Programs and services:

- Grant's through the Community Development Block Grant program and Main Street program
- Technical and planning assistance
- Tax credits for community development projects
- Development of community volunteer programs

,

Rural Development: Community Development

Fiscal Year 2009 highlights:

- Provided \$18.4 million in federal Community
 Development Block Grant funds to 57 projects,
 producing \$181.5 million in private investments,
 benefiting 85,440 Kansans and creating 154 jobs.
- Assisted 25 Main Street cities, resulting in:
 - 201 new or expanded businesses in downtown districts (64 more than lastyear)
 - 386 new jobs
 - \$25 million reinvested in downtown districts

Rural Development: Community Development

Fiscal Year 2009 highlights (continued):

- Per the federal stimulus bill, the Division administered two new federal programs – the Neighborhood Stabilization Program and the CDBG-R Program – designed to help communities hit hardest by the housing crisis.
- Per the stimulus bill, the Division unveiled Connect Kansas, an initiative to bring high-speed Internet to underserved areas in rural Kansas.

22

Trade Development

Goal:

- To help Kansas companies expand sales to overseas markets and to recruit foreign companies
 to set up facilities in Kansas.
- Programs and services:
- Organize trade delegations to foreign countries
- Provide export data and foreign market research
- Provide funds for firms to attend trade shows
- Connect Kansas companies with foreign buyers
- through our international trade offices
- Recruit international companies to locate in Kansas

Trade Development

Fiscal Year 2009 highlights:

- Helped Kansas businesses achieve record-high export totals – \$12.47 billion – for the fourth straight year.
- Facilitated international investment projects that created 1,190 Kansas jobs and \$348 million in capital investment.
- Announced Cereal Ingredients Inc. as the winner of the 2009 Governor's Exporter of the Year Award for excellence in international marketing.

Travel & Tourism

Goal:

- To increase tourism expenditures in Kansas

Programs and services:

- -Attraction Development Grant program
- Product development
- Marketing grants
- Group tour development
- KANSAS! magazine
- Travel Information Centers

25

Travel & Tourism

Fiscal Year 2009 highlights:

- Promoted the Flint Hills by assisting with the Flint Hills Visitors Guide, the annual Symphony in the Flint Hills and the Flint Hills Heritage Conference.
- Partnered with Department of Transportation to expand road signage in the Flint Hills.
- Awarded \$129,670 in Attraction Development Grants to six tourism projects, which produced \$257,500 in matching funds.
- Unveiled the Take Kansas Home project to promote Kansas products to tourists.

26

Workforce Development

Goal:

 To link businesses, job seekers and educational institutions to ensure a pool of skilled Kansas labor

Programs and services:

- KIT, KIR and IMPACT programs
- Workforce Centers
- KANSASWORKS.com
- Registered Apprenticeship
- Trade Adjustment Assistance and Rapid Response

27

Workforce Development

Fiscal Year 2009 highlights:

- Administered \$18.4 in federal ARRA funds to create jobs and address workforce needs.
- Provided \$62.5 million through the KIT, KIR and IMPACT training programs to fund 112 projects.
- These projects resulted in:
 - \$276.2 million in private matching funds
 - 16,455 individuals trained
- Partnered with the Kansas Department of Labor to streamline registration for Unemployment Insurance and job-search services.

Kansas Athletic Commission

Fiscal Year 2009 highlights:

- Sanctioned dozens of events, including boxing, wrestling and mixed martial arts contests.
- Hosted events in Kansas City, Lawrence, Dodge City, Fort Scott, Pittsburg, Topeka, Wichita and Junction City.
- Continued to certify fighters, promoters, referees, judges and ringside doctors.

29

Kansas Commission on Disability Concerns

Fiscal Year 2009 highlights:

- Continued to grow the Americans with Disabilities Act Information Network to provide information, updates and resources to ADA coordinators in all 105 Kansas counties and all State agencies.
- Continued to grow the Emergency Preparedness Information Network to provide people with disabilities, service providers and emergency managers with information and training announcements for service providers and the people with disabilities with whom they work.

Kansas Film Commission

- Fiscal Year 2009 highlights:

 Helped create \$25 million in film production spending.

 Provided assistance to:
- - Independent features
 - Earthwork
 - Cable television shows
 - History Channel, Discovery Channel
 - Commercials
 - Hy-Vee
 - Documentaries
 - Dirt! The Movie

Balancing the Budget Without Tax Increases

1

Taxes Aren't the Problem

- ➤ Tax increases are bad for any economy.
- ➤ Lack of tax growth over the last few years is not the underlying cause of budget crisis.
- ➤ Recession caused a revenue decline but we could have withstood the impact if we hadn't spent down a \$935 million surplus.
- ➤ Would have a \$3 billion surplus if spending had been limited to 4½% growth each of the last 5 years.

3

Main Topics of Testimony

- > Avoid harmful and unnecessary tax increases.
- ➤ Implement broad, comprehensive efficiency studies to find ways to provide services at reduced spending levels.
- ➤ Use a portion of carryover cash reserves to close the current shortfall.
- ➤ Position Kansas for economic recovery and a stronger competitor for jobs.

2

Strong Growth in Tax Receipts

- ➤ Total SGF revenues declined in FY 2008 but taxes increased.
- ➤ Tax receipts increased 40% FY 2001-08:
 - ➤ Exclusively paid by businesses +83%.
 - ➤ Exclusively paid by individuals +47%.
 - ➤ Retail sales tax +20%.
 - ➤ See "Kansas General Fund Receipts."

2-2

\$Billion Exemptions Misleading

- ➤ Taxes were growing fast, not declining.
- ➤ Dept. of Revenue says \$1.108 billion foregone in FY 2008 (see DOR Estimated Effect).
- ➤ Had \$1.108 billion more been collected in FY 2008, we would have had a 66% tax increase over 7 years instead of 'just' 40%.
- ➤ Actual tax increase of nearly 6% per year was double the inflation rate.

5

Uncompetitive Tax Climate

- ➤ Some may take comfort in being ranked in the 20s or 30s, but that's not competitive.
- ➤ KLRD 2009 Tax Facts: per capita state & local taxes increased 28% from FY 2004-08.
- ➤ Using % of personal income is a misleading measurement; personal income includes amounts not available to pay taxes (see Kansas Personal Income).

7

\$Billion Exemptions Misleading

- ➤ Top 6 items on DOR exemption list for FY 2008:
 - Property tax: \$460 million (from 35 mills to 20 mills a few years after revaluation).
 - ➤ Car tax: \$121 million (1998)
 - ➤ Earned income tax credit: \$62 million (1999)
 - ➤ Single income rate reductions: \$59 million (1998)
 - ➤ Food sales tax rebate: \$41 million (1999)
 - ➤ Increase personal exemption: \$37 million (1999)
- ➤ Relief justified: SGF revenue grew 75% FY 1990 to FY 1998.

6

Rich States, Poor States

➤ 2009 ALEC / Laffer state economic index (rank).

	<u>Outlook</u>	<u>Performance</u>
Kansas	24	42
Colorado	2	10

Texas	11	46	7	39	9	30
					•	

10

Can't Afford a Tax Increase

- ➤ Financially all taxpayers have been hurt by recession; higher taxes will have a negative impact on economy and jobs.
- ➤ Competitively already at a competitive disadvantage; avoiding a tax increase is the best competitive message we can send.
- ➤ Viable alternative reduce spending through efficiency reviews.

11

Put Spending in Perspective

- ➤ Governor's FY 2010 estimate is \$5.451 billion.
- ➤ Proposed budget of \$5.831 billion is \$1.14 billion higher than FY 2005 (see Expenditure History).
 - ➤ General Government + \$74 million / 41%.
 - ➤ Education + \$755 million / 25%.
 - ➤ Human Services + \$262 million / 24%.
- ➤ State provided good services when we spent a billion less; we can get there again by scrutinizing expenses.

K-12 Can Be Reduced

- ➤ Largest portion of budget and largest dollar increase since FY 2005.
- ➤ Fortunately, ample evidence that the same outcomes can be achieved at lower spending.
- ➤ July 2009 LPA study listed 80 recommendations to reduce costs and achieve same outcomes.
- ➤ Derby volunteered for LPA efficiency audit; even though efficient compared to peers, could still save \$1 million by changing scheduling system.

13

K-12 Can Be Reduced

- > No independent study to establish necessary spending.
- Augenblick & Myers report hardly qualifies, even acknowledging the figures in their professional judgment approach largely "...reflect the assumptions that were used to calculate them...(and) could change more substantially if other people, informed by experience, research and expertise, thought the objectives identified to the panels could be met even if some components were modified or eliminated." (Volume II: Analysis of Montoy vs. State of Kansas, p. 28).

15

K-12 Can Be Reduced

- ➤ 2006 LPA study often cited as justification for higher spending...here's what it really said:
 - "...it's important to remember that these cost studies are intended to help the Legislature decide appropriate funding levels for K-12 public education. They aren't intended to dictate any specific funding level, and shouldn't be viewed that way.

Finally, ...we weren't directed to, nor did we try to, examine the most cost-effective way for Kansas school districts to be organized and operated. Those can be major studies in their own right."

14

K-12 Can Be Reduced

- A&M professional judgment approach merely reflected opinions of panel of education 'insiders'; 87% of panelists were employed by or retired from school organizations.
- ➤ A&M decided not to use efficiency in successful schools approach when their preliminary research found that 50 of the 85 districts they considered 'successful' would be excluded as inefficient spenders, saying that excluding them would preclude the possibility that higher spending is what allowed them to be successful (Vol. II, p. 29).

Vol. 3: Analysis of K-12 Spending

- > FY 2005-08: +\$1.15 billion / +27% (see Table 4).
- ➤ Largest non-instructional growth (millions):

Operations & Maint.	\$80.4	22%
Capital Outlay	\$73.5	37%
Debt Service	\$61.0	21%
Staff Support	\$55.7	36%
Student Support	\$46.5	24%
School Administration	\$44.3	20%
Food Service	\$35.5	19%
Central Services	\$31.1	35%

17

Vol. 3: Analysis of K-12 Spending

- ➤ 55% of total budget goes to Instruction, about the same level as pre-Montoy. (Table 6).
- ➤ Per-Pupil spending FY 2008 ranged from \$9,017 to \$25,240 (Table 8).
- ➤ \$636 million potential savings if high-spenders had been at median cost-per-pupil of similar sized districts. (Table 9).

18

Vol. 3: Analysis of K-12 Spending

- ➤ Data does not support schools' belief that higher spending causes higher achievement.
- ➤ Spending for districts that averaged over 80% achievement on state assessment tests varied by <u>at least \$7,000 per pupil</u> (Table 12).
- ➤ Districts with less than 1,000 students have the highest average cost-per-pupil, but 61 of them spent less than State average and averaged at least 80% on Reading (Appendix 'G').

19

Vol. 3: Analysis of K-12 Spending

- ➤ Schools cite 2006 LPA as basis for 'higher spending = higher achievement' (page 15).
- ➤ LPA found a correlation <u>but not causation!</u> They said the educational research on that issue was mixed (page 15).
- ➤ 2008 KU study says "recent changes to school funding in Kansas reveal little evidence of improving student outcomes as measured by test scores." (page 15).

Making Government Efficient

- ➤ No evidence that government spends efficiently.
 - ➤ Efficiency studies have not been performed.
 - Budget process is really just a spending process...no analysis of past spending.
 - ➤ Lack of accountability = unnecessary spending.
- ➤ Streamlining Government Commission is a great idea; should be a regular occurrence.

21

Priority-Based Budgeting

- ➤ More effective & efficient, results-oriented and customer-focused.
- ➤ Agencies must prioritize programs and specify in each case:
 - ➤ What is the specific goal of this program?
 - ➤ How effective has this program been?
 - ➤ What are we buying for these services?
 - ➤ Who are we serving?
 - How much does it cost?

23

Better Budget Process

- ➤ Compare to prior year actual, not budget.
- ➤ Budget monthly, not annually.
- ➤ Only fund filled positions, not authorized but unfilled positions.
- ➤ Use priority-based budgeting.

2

Priority-Based Budgeting

- ➤ Appropriations hearings focus on cost <u>and</u> priorities.
- ➤ Agencies are forced to choose which programs to cut or reduce ahead of time, based on amount of money available.
- ➤ Legislators can assign priorities to fully fund certain agencies and allocate equally to others or use a variety of other allocation methods.

2-7

Carryover Cash Reserves

- > Efficiency studies take time; use a portion of unencumbered cash reserves to buy time.
- ➤ State agencies and universities still have over a \$billion, not counting PMIB, unemployment trust, SGF and other funds (see Agency Totals).
- ➤ Schools started the year with \$700 million, not counting capital projects and debt service (see K-12 unencumbered balances).
- > Only a fraction of the total is needed to balance budgets.

25

Recommendations

- ➤ Avoid harmful and unnecessary tax increases.
- ➤ Use a portion of carryover cash reserves to close the current shortfall.
- ➤ Implement broad, comprehensive efficiency studies to find ways to provide services at reduced spending levels.
- ➤ Position Kansas for economic recovery and a stronger competitor for jobs.

27

Carryover Cash Reserves

- ➤ Balances growing annually, which only happens when revenues exceed expenses. Agencies and schools didn't need all of the money.
- ➤ Dale Dennis says schools can use those balances to free general fund money (presentation to Board of Education on Nov. 10, 2009).
- ➤ No independent analysis of school or agency balances to determine necessary ending balance in each fund. Audit should be performed to determine how much of the carryover reserves can be made immediately available.

¹Payment to persons for which no current services are performed, as well as payments to non-profit institutions by governments and by businesses. Government payments to individuals includes retirement and disability insurance benefits, medical payments (mainly Medicare and Medicaid), income maintenance benefits, unemployment insurance benefits, veterans benefits, and Federal grants and loans to students. Government payments to nonprofit institutions excludes payments by the Federal Government for work under research and development contracts. Business payments to persons consists primarily of liability payments for personal injury and of corporate gifts to nonprofit institutions.

Note: State and Local taxes per Kansas Legislative Research Division; income data is for the calendar year ended within the fiscal year.

A KANSAS PRIMER ON EDUCATION FUNDING

Volume III: Analysis of K-12 Spending in Kansas

Dave Trabert

Advocating free enterprise solutions in education, fiscal policy and health care.

Formerly known as Flint Hills Center for Public Policy, Kansas Policy Institute was founded in 1996 and advocates for free enterprise solutions and for the protection of personal freedom for all Kansans. We're in the process of changing our name to emphasize that we focus on the entire state of Kansas and not just a particular region.

Guarantee of Quality Scholarship

Kansas Policy Institute is committed to delivering the highest quality and most reliable research on state and local issues in Kansas. The Institute guarantees that all original factual data are true and correct and that information attributed to other sources is accurately represented.

Preface

Perhaps no subject in Kansas has been more controversial in recent history than school funding. Years of court battles earlier in the decade culminated in 2005 with the Kansas Supreme Court ruling in favor of plaintiffs in *Montoy vs. State of Kansas* and ordering the Legislature to increase funding by \$853 million. State aid to schools increased by \$646.1 million between the 2004-05 school years and the 2009-10 budget and total funding to schools has increased by \$1.36 billion. A severe decline in State tax receipts (\$498 million / 8.6% for FY 2009, with the first quarter of FY 2010 down 10.2%) prompted the Legislature and Governor Parkinson to reduce school funding for FY 2010, and schools are threatening to file yet another lawsuit.

Despite the unprecedented controversy, surprisingly little is understood about how much money schools actually receive, how that money is spent or even the basis upon which the court ruled in *Montoy*.

Education is extraordinarily important to the success of our State and to each individual. It is imperative that students receive an education that prepares them to enter the workforce, whether directly into their chosen field or first into higher levels of education. But while education is of critical importance, we must balance our approach to defining and funding a proper education with other essential needs. We must also have adequate funding for other necessary government services and the revenues required to fund all services cannot be so high as to necessitate a tax burden that impedes economic growth.

A Kansas Primer on Education Funding provides a high level of transparency and analysis so that taxpayers and legislators are empowered to make informed decisions going forward. The Primer is being published in four separate volumes.

Volume I: The History of Education Finance in Kansas traces school funding developments, starting at the incetion of statehood in 1863 and leading up to the filing of the above-mentioned *Montoy*.

Volume II: Analysis of Montoy vs. State of Kansas provides a detailed examination of the legal and political forces at play during the Montoy litigation. It also identifies existing barriers that prevent or restrict efforts to reform the system and offers specific recommendations for overcoming those barriers.

Volume III: Analysis of K-12 Spending in Kansas identifies how court-mandated funding increases were spent by Kansas school districts and compares per pupil spending across districts in search of minimum spending levels that, at least under current curriculum standards, produce adequate results. It also offers specific alternatives to "just spend more" that provide reasonable funding to schools without raising taxes or eliminating other necessary government services.

Volume IV: Defining and Funding a Proper Education examines whether Kansas schools are providing an education that gives students the opportunity to gain substantial skills needed for citizenship, further education and functioning in today's job market. It also offers proposals to improve the current education delivery process, explores alternatives to the current funding methodology and examines existing and alternative methods of measuring student (and school) performance.

he-e

The development of the *Primer* has been an extraordinary undertaking by a relatively small group of very dedicated and talented people. The authors, whose names and biographies are contained within each volume, were greatly assisted by intern Chris Brito, who helped with data collection; Grace Harris assisted with data collection and proofreading; Paul Soutar designed the timeline and graphs; Gretchen Colón designed the layout for the Primer and managed the distribution process.

We are very passionate about the future of education and hope that this Primer can in some way serve to inspire citizens and legislators. The road to excellence is not an easy one to navigate but is well worth the journey. Along the way, we must remember the words of Henry Ford, who said "Obstacles are those frightful things you see when you take your eyes off your goal."

We welcome constructive thoughts and suggestions as we strive to improve the educational climate in our state and to be responsible stewards of the finances which fund education.

Dave Trabert

President, Kansas Policy Institute

About Author

Dave Trabert is the President of Kansas Policy Institute. Trabert developed his interest in the public policy arena during his 18-year career in managing television stations. Most recently Trabert served as general manager of WYTV in Youngstown, Ohio, an area beset with chronic employment issues resulting from a high tax burden, low education attainment and a lack of regionalism. Trabert initiated community discussions, published an extensive white paper on the issue and led a research-driven education campaign focusing on possible solutions for removing job growth barriers. He graduated cum laude from West Liberty State College with a degree in Business Administration and previously managed KAKE-TV in Wichita. Trabert does research and writes on fiscal policy issues.

Introduction

An old aphorism says that there will always be wars and rumors of wars, and while it applies to nations and kingdoms, the same might be said of K-12 funding in Kansas. As explained in *Volume I: The History of Education Finance in Kansas*, battles have been fought in Kansas courts as far back as *Caldwell vs. State of Kansas* (1972) and most recently *Montoy vs. State of Kansas*, which concluded in 2005. Indeed, the sabers are rattling yet again as some 70 school districts belonging to Schools For Fair Funding (SFFF) are using taxpayer funds to hire attorneys, seeking to persuade the Kansas Supreme Court to re-open *Montoy* citing spending reductions imposed by the Legislature and Gov. Mark Parkinson in reaction to precipitous declines in State revenue.

Many battles have been waged over issues of equity and adequacy but even court decisions have not answered the fundamental question: what is the minimum cost of providing an education that meets the constitutional suitability standards established by the Kansas Supreme Court? The court referred to an Augenblick & Myers cost study to justify its order to increase funding but as noted in *Volume II: Legal Analysis of Montoy vs. State*, the basis for that study amounted to little more than surveys of a very small number of teachers and administrators who were effectively asked to pick their own salaries and budgets.

So the rumors of school funding wars persist, with legislators and taxpayers asking 'how much is enough?' and schools pressing for more money with no real end in sight. Speaker Pro Tem Arlen Siegfried (R-Olathe) shared with me a conversation he had with Mark Tallman, Assistant Executive Director/Advocacy for the Kansas Association of School Boards (KASB), which illuminates the dynamics at play:

Early last session Mark Tallman and I engaged in a conversation about the budget and school spending. During the conversation the difficulty of increasing school spending as 'required' by Montoy was juxtaposed against the need to cut school spending by the same percentage as other portions of the State budget. During our discussion I asked Mr. Tallman if we (the State) had the ability to give the schools everything he asked for would he still ask for even more money for schools. His answer was, 'Of course, that's my job'.'

If the KASB philosophy is representative of schools at large, it only underscores the need to establish a rational basis to ascertain minimum funding levels.

Determining the minimum cost of providing a proper education is an extraordinary challenge, in part because the first step of doing so is to confirm that schools are in fact providing a proper education. How, after all, can anyone know whether education is adequately funded

¹ E-mail received from Rep. Arlen Siegfreid on October 14, 2009.

98-8

without first knowing whether schools are providing an adequate education? Does the funding mechanism respect the needs of and differences among students? Does it allow students the opportunity to gain substantial skills for citizenship, to further their education and prepare them to function in today's job market? A diploma certifies completion of statemandated curriculum, but does the curriculum impart the skills required by the workforce?

These are questions that will be addressed in *Volume IV: Defining a Proper Education*. This Volume will identify how the court-mandated funding increases were spent by Kansas school districts and compare district per-pupil spending levels in search of minimum spending levels that, at least under current curriculum standards, produce adequate results. It is hoped that these findings empower taxpayers and legislators with alternatives to "just spend more" that provide reasonable funding to schools without raising taxes or eliminating other necessary government services.

We had hoped to publish Volume III in November, 2009 comparing revenues and expenditures from FY 2005 to those from FY 2009. The Department of Education has released Revenues and Total Expenditures but unfortunately, per-pupil expenditures for FY 2009 have been delayed, so to provide some measure of analysis prior to the start of the 2010 Legislative session this analysis uses FY 2008 data. We will publish an updated version when FY 2009 per-pupil expenditure data is available.

I. School Funding Sources

As explained in *Volume II*, the Kansas Supreme Court ordered the Legislature to increase spending on schools by \$853 million over several years beginning with the 2005-06 year. Legislators responded by appropriating an additional \$289 million for the 2005-06 year and in the 2006 legislative session they appropriated another \$466 million to be phased in over the next two years. The court eventually determined that the total increase of \$755 million was "close enough" to the \$853 million it originally ordered and dismissed the case.

The Legislature continued to increase school funding beyond its original commitment of \$755 million, hitting a peak of a \$925 million total increase in the 2008-09 year until a severe decline in state tax receipts prompted the Legislature and Gov. Parkinson to reduce school funding for FY 2010.²

The budget approved by the Legislature used a \$245.3 million increase in federal aid to backfill an approximate \$250 million reduction in state aid; the *Governor's Plan to Balance FY 2010*

² State General Fund tax receipts declined \$498 million (8.6%) for FY 2009. The first five months of FY 2010 declined 10.2%.

Budget further reduced state aid by \$39.1 million.³ Tax collections fell even more than predicted in the first few months of FY 2010, prompting Gov. Parkinson to further reduce aid to schools. A portion of that reduction in state aid was offset by additional federal aid.

Skirmishes over school funding are always focused on state aid but schools also have local and federal sources of revenue. According to the Kansas Department of Education, schools will have total revenue of slightly over \$5.5 billion in the 2009-10 school year. Thanks to increases in federal and local funding, the Department of Education predicts total K-12 revenues to be just 2% less than the previous year. Per-pupil expenditures are predicted to decline \$435, or 3.43% (an enrollment increase causes the decline in per-pupil aid to be slightly more than in total aid).

Table 1: Kansas K-12 Funding History

	FTE		Revenue Source (millions)					
School Year	Enrollment	State	Federal	Local	Total			
2003-2004	443,301.8	2,124.6	376.9	1,592.6	4,094.1

Source: Kansas Department of Education

It is important to note that there are multiple components of state aid to schools. Much of the attention is on Base State Aid Per-pupil (BSAPP) but that number is simply the starting point for an extremely complicated formula that employs multiple weighting factors to add money to the base. Those weighting factors include Low Enrollment, High Enrollment, Transportation, Vocational Education, Bilingual Education, At-Risk, Non-Proficient At-Risk, School Facilities, Ancillary School Facilities, Special Education, Declining Enrollment and Cost of Living. Additional aid is provided for bond principle and interest payments.

⁺²⁰⁰⁹⁻²⁰¹⁰ estimated; data updated December 16, 2009.

³ Upon subsequent release of final funding totals for FY 2009, state aid was \$10 million less than anticipated, thereby lowering the total reduction in state aid to \$279 million. Federal aid, however, was higher than projected for FY 2009, thereby reducing the overall FY 2010 increase to \$221.7 million.

Table 2: State Aid Per Pupil

School Year	Base	Other	Total
2003-2004	3,863	930	4,793
2004-2005	3,863	1,483	5,346
2005-2006	4,257	1,749	6,006

2007-2008	4,374	2,634	7,008
2008-2009	4,400	2,944	7,344
2009-2010 (estimated)	4,012	2,280	6,292

Source: Kansas Department of Education

Reported Revenues Are Understated

The Department of Education systematically understates the amount of local aid that school districts receive. When it calculates the amount of local aid districts receive, it does so by subtracting the amount of state and federal aid from total expenditures. Certainly, the remaining expenditures would have been covered by local revenue. But there is more to the story than the department's simple calculation suggests.

That's because school districts can draw on unspent funds they received in previous fiscal years. Their annual budget reports to the State include the unencumbered cash balances in each of their funds (usually about 30 funds each year). Unencumbered cash is money that has no legal claim against it (mortgages, liens, accounts payable, etc.) The availability of unencumbered funds held by schools and other units of government is a subject of much debate but that is not the issue here; rather, it is the fact that these balances have changed significantly.

Table 3: Unencumbered Carryover Cash Balances

	Balance as of July 1		4-Year Change (2	2005-2009)
	2005	2009	Amount	Percent
Capital and Debt				
Capital Outlay	320,075,543	451,672,840	131,597,297	41%
Bond and Interest #1	269,090,483	327,700,705	58,610,222	22%
Bond and Interest #2	15,567,848	16,550,982	983,134	6%
· · · · · · · · · · · · · · · · · · ·	604,733,874	795,924,527	191,190,653	32%
Federal Funds	5,729,302	3,827,639	(1,901,663)	-33%
All Other State & Local Funds	458,173,556	699,150,812	240,977,256	53%
_	1,068,636,732	1,498,902,978	430,266,246	40%

Source: Kansas Department of Education

Capital and debt service balances may increase because of timing issues. There may be a lag between receiving bond proceeds and purchasing assets, or between collecting taxes to cover bond payments before payments are due. But regardless of whether we look at capital, debt service or other funds, annual unencumbered cash balances only grow when revenues exceed expenditures. So the 53% growth in the "All Other State and Local Funds" unencumbered balances has two very significant meanings: (1) total revenue was even higher than that reported by the Department of Education and (2) schools could have functioned the same on less money. The only difference would be that their operating cash balances wouldn't have grown and they would have foregone any interest income on the increased balances.

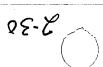

II. Expenditure Overview

Kansas Policy Institute staff obtained school district expenditure data from the Department of Education, both by specific request and from their website. Data was downloaded by functional expenditure code (Instructional, School Administration, Transportation, etc.) for each of 29 separate funds and combined to generate total expenditures across 13 functional cost centers⁴ for each of 295 districts. In order to show how schools spent court-mandated increases we compared pre-Montoy expenditures from the 2004-05 school year to expenditures for the 2007-08 school year. (A comparison to the 2008-09 school year will be published once per-pupil data is released by the Department of Education.)

We made the following adjustments to simplify this report:

- Operations & Maintenance Transportation expenditures are included in Student Transportation Services in order to reflect the total cost of transportation services.
- Operations & Maintenance Food Services expenditures are included in Food Services in order to reflect the total cost of food services.
- Unless otherwise noted, all expenditures from the Capital Outlay fund are shown as Capital Outlay rather than being broken down into partial allocations to the Instruction and other current functional costs areas, as districts typically do. We did this to separate long term capital costs from current operating expenditures, which would otherwise show atypical spikes or declines and thereby invalidate functional cost comparisons between districts.
- Food Service includes costs listed in the KPERS Special Retirement fund and classified as Operation of Non-Instructional Services.

⁴ See Appendix "A" for definitions.

Total Spending

Total expenditures jumped 27% in the first three years of court-ordered funding increase, going from \$4.3 billion to \$5.4 billion.⁵ The percentage increases to current and long term spending categories were nearly the same.

Table 4: Current and Long Term Spending Growth

	FY 2005	FY 2008	\$ Change	% Change
Instruction	2,287,527,137	2,967,024,150	679,497,013	29.7%

Total Spending	4,270,885,561	5,420,936,950	1,150,051,389	26.9%

Source: Kansas Department of Education; long term costs not allocted to current costs

Discussions of spending in schools and other government entities typically are focused on the General Fund, but the majority of spending often flows through other funds. There are two primary reasons for the use of multiple funds. One is to isolate revenue that is legally dedicated to a specific purpose, such as proceeds for voter-approved bond sales. The Legislature also will occasionally create new funds in order to isolate specific types of aid for tracking purposes.

In addition to examining changes in total expenditures, it's also instructive to study how expenditures in individual funds have grown. Of course, the re-direction of expenditures into new funds can skew the analysis of other funds. For example, in FY 2005 At Risk expenditures flowed through the General Fund but new At Risk funds were created in FY 2006; accordingly,

⁵ There is a slight difference between the sum of expenditures detailed within each fund and total expenditures reported by the Department of Education. The total reported by DOE by is higher for both FY 2005 and FY 2008, by \$25.4 million (0.5%) and \$18.5 million (0.4%), respectively.

the growth in General Fund spending as compared to FY 2005 is artificially low, since At Risk spending in that year was included in the General Fund total.

Table 5: Change in Spending by Fund

_	Spending Net	of Transfers	3-Year Ch	ange
	FY 2005	FY 2008	Amount	Percent

Spending on Instruction

In 2005 the legislature took several steps to monitor how schools spent the additional money that was being appropriated. The 2010 Commission was established to advise legislators on a number of school finance issues, including whether weightings used to calculate school aid

7E-E

were equitable and whether the system was efficient and effective. A statutory policy goal was also adopted as Article 72-64co1 of the Kansas Revised Code, declaring that at least 65% of the total amount appropriated be spent "...in the classroom or for Instruction." At the time, this concept was being promoted around the country as a means of increasing efficiency and improving achievement. Most schools and some policy experts question the efficacy of attempting to force schools to direct larger portions of their budget to Instruction, partly because there is considerable disagreement over what costs should be classified as 'Instruction.'

This analysis does not explore the merits of the so-called 65% solution but the fact that the legislature clearly intended that schools use the increased funding to devote larger portions of their budgets to Instruction warrants investigation. Elsewhere in this analysis we have included all capital outlay costs as long-term spending rather than allocate portions to current spending as reported by school districts, but both methods are shown here in order to fairly measure districts' efforts to comply with the Legislature's intent.

Table 6: Percent of Total Budget Spent on Instruction

	All Capital L	R	eported b	y Districts	
	FY 2005	Y 2005 FY 2008		Y 2005	FY 2008
Instruction	53.6%	54.7%		54.4%	55.6%
Other current	35.1%	33.8%		36.0%	34.8%
	88.6%	88.5%		90.4%	90.4%
Capital / Debt	11.4%	11.5%		9.6%	9.6%
	100.0%	100.0%		100.0%	100.0%

Source: Kansas Department of Education

The statewide portion of total expenditures spent on Instruction shows relatively little change but there has been more of a shift within specific districts. As shown in Table 7, which considers all capital outlays as long term costs, it is apparent that some districts raised the portion of their budget allocated to Instruction but others allocated less to Instruction.

Table 7: Distribution of District Expenditures on Instruction

% Spent On		FY 2005 A	ctual				FY 2008 A	tual*	
Instruction	FTE	% Total	Districts	% Total		FTE	% Total	Districts	% Total
Under 50%	54,408.8	12%		8%		43,282.7	10%	14	5%
50% to 54.9%	182,343.9	41%	[`] 95	32%		200,489.7	45%	79	27%
55% to 59.9%	162,696.7	37%	124	41%		140,292.7	31%	116	39%
60% to 64.9%	36,957.9	8%	48	16%	- '41	57,154.6	13%	79	27%
Over 65%	5,460.3	1%	8	3%		6,746.0	2%	6	2%
	441,867.6	100%	300	100%		447,965.7	100%	294	100%

Source: Kansas Department of Education

The percentage of students in districts that allocate 60% or more of their budgets to Instructional costs rose from 9% to 15%. The majority (and in fact a larger share) of students, however, continue to be in the lower two levels.

Expenditures Per-pupil

One of the more shocking aspects of school spending is the extreme low-to-high range of expenditures per-pupil. (All calculations of 'per-pupil' expenditures use Full Time Equivalent (FTE) enrollment data in keeping with standard Department of Education practice.) A certain degree of variance is to be expected but the 'high' is more than double the 'low' for both Current Operating⁶ and Total Costs across all districts. There is also quite a large degree of variance among districts with similar enrollment.

Table 8: Per Pupil Spending Range by District Size

		Total	Per F	High-Low		
	Districts	FTE	High	Avg.	Low	Variance
Current Operating						
Less than 100 FTE	7	580.0	17,926	16,127	14,873	21%
100 to 499	129	38,438.4	18,774	12,306	9,790	92%
500 to 999	79	56,282.1	16,322	11,089	8,513	92%
1,000 to 1,999	37	53,447.1	15,433	9,954	7,949	94%
2,000 to 2,999	15	36,203.3	15,960	10,810	7,956	101%

⁶ Current Operating includes all costs except Capital Outlay, Debt Service and Architecture & Engineering.

4E. C

Comparisons for individual cost centers can be found in Appendix "B", which shows even greater degrees of variance. For example, spending on General Administration in districts with enrollment of 1,000 to 1,999 ranges from a low of \$133 per-pupil to a high of \$773 per-pupil. Some of these extreme variances may result from districts not recording expenditures in accordance with established accounting procedures. A July 2009 Performance Audit Report from the Legislative Division of Post Audit (LPA) said "school districts didn't always report certain types of data consistently, making meaningful comparisons difficult." The report went on to say that "while the State accounting handbook...provides good guidance to districts on how to categorize spending, districts don't always follow it."

It is of critical importance that districts adhere to State accounting guidelines so that legislators and the public can monitor the efficient use of taxpayer funds, especially since K-12 education consumes over half of the State General Fund. Legislators may want to consider implementing a penalty for non-compliance; one sure way to get districts' attention would be to reduce State aid for repeat offenders.

Of course, while comparison of individual cost centers may be somewhat affected by some districts' failure to follow State accounting guidelines, any such differences are eliminated when comparing total expenditures. Also, the magnitude of the low-to-high range for total spending indicates that, accounting errors aside, there are quite significant real variances in per-pupil spending at the cost center level.

It would be unrealistic to expect cost per-pupil to be uniform across the state, as some students, particularly those categorized as Special Education, At Risk and English Language Learners, legitimately cost more to educate than others. Districts with higher proportions of enrollment in those categories will have higher costs. Total enrollment also impacts perpupil costs, as low enrollment districts have fewer students over which to spread their administrative and other non-instructional expenditures.

But while there are understandable per-pupil variances, there is also tremendous opportunity for individual districts to reduce spending while achieving the same outcomes. The LPA report on school district efficiency included 80 recommendations to reduce costs without impacting outcomes. That study was the first of what was initially intended to be a two-phase audit ordered by the 2010 Commission, with LPA performing on-site audits of each district to help them identify efficiencies. Unfortunately, districts objected and convinced the 2010 Commission to cancel the mandatory audits and made them voluntary.

⁷ Legislative Division of Post Audit, "K-12 Education: School District Efficiency Audits," page 17 http://www.kslegislature.org/postaudit/audits_perform/o8pa11a.pdf. (accessed Dec. 24, 2009).

⁸ Districts receive additional funding for students in these categories through additional weightings for At Risk and English Language Learners and for Special Education cost reimbursements.

⁹ "Lack of Data, Oversight Raises Questions on School Spending," KansasWatchdog, July 23, 2009 http://kansas.watchdog.org/2009/07/23/lack-of-data-oversight-raises-questions-on-school-spending/.

Four districts (Derby, Ellinwood, Renwick and Winfield) of the current 293 statewide volunteered for the efficiency audits. Only the Derby audit has been completed at this writing but it already has reinforced the findings of their earlier study. The audit found that even though Derby is more efficient than most peer districts, it could still save another \$1 million per year.

As evidenced by these audits, there is no question that Kansas school districts can operate more efficiently and achieve the same outcomes. The issue now is to determine how much might be saved statewide.

We attempted to answer that question by grouping districts by enrollment size and calculating the median cost per-pupil for each functional cost center. Next, we calculated the difference between the actual spending for each district and the median spending of its group. The total potential savings, as shown in Table 9, is quite astounding: \$461 million in current operating costs and another \$174 million in capital and debt service.

Table 9: Savings if High-Spending Districts Could Move to Median Cost Per Pupil

•			Total	Capital /	Total
District Size	Instruction	Other Current	Current	Debt Service	Spending
Less than 100 FTE	140,378	544,634	685,012	910,758	1,595,770
100 to 499	15,083,555	24,393,841	39,477,396	30,141,802	69,619,198
500 to 999	26,277,765	30,706,475	56,984,240	22,686,726	79,670,966
1,000 to 1,999	21,448,219	25,201,866	46,650,086	20,731,480	67,381,565
2,000 to 2,999	40,765,145	16,767,748	57,532,893	10,997,948	68,530,841
3,000 to 9,999	56,217,480	55,177,311	111,394,791	32,927,972	144,322,762
Over 10,000	49,961,923	98,743,613	148,705,536	55,969,074	204,674,610
All Districts	209,894,465	251,535,487	461,429,952	174,365,759	635,795,712

FY 2008 Per-pupil spending for each cost center by district is listed in Appendix "C". Districts are grouped by enrollment size and the calculations for High, Median, Average and Low spending per-pupil are shown for each grouping. Appendix "D" shows the growth in perpupil spending between FY 2005 and FY 2008 with districts listed by USD number in ascending order.

There may be valid reasons why some districts could not match the median cost per-pupil of similar sized districts, but it is also possible that districts below median could also find ways to save money. The potential savings is sufficiently large, however, to more than enough to warrant the effort. Even if only half of the potential savings were actually realized, the savings

[&]quot;First School Audit Finds \$1 Million in Potential Savings in Derby District," KansasWatchdog, December 24, 2009 http://kansas.watchdog.org/2009/12/24/first-school-audit-finds-1-million-in-potential-savings-in-derby-district/.

98-8

would still be in the hundreds of millions. Every dollar saved is a dollar that doesn't have to be unnecessarily taken from taxpayers or cut from other essential services, which is very good news for all Kansans.

Spending vs. Achievement

One of the objections to finding ways to lower the cost of education is the belief that spending more money raises achievement levels, which leads some to believe that spending less will lead to lower achievement. It's true that state assessment test scores show that proficiency scores have increased, and it's also true that this occurred while per-pupil spending was growing, but as shown in Table 10, the relative growth rates have not been proportional.

Table 10: Spending & Achievement Comparison

			' 00 - ' 05		'05 - '09
	2000	2005	Change	2009	Change
Reading proficiency	59.2	73.1	23.5%	85.7	17.2%
Math proficiency	50.3	68.1	35.4%	82.8	21.6%
State aid per pupil	4,704	5,346	13.6%	7,344	37.4%
Total aid per pupil	7,585	9,707	28.0%	12,660	30.4%

Source: Kansas Department of Education

Reading and Math proficiency scores actually grew faster between the school years of 2000 and 2005 when state and total per-pupil spending was increasing much less than in later years. In fact, the growth in proficiency scores from 2005 to 2009 has actually been less than the growth in per-pupil spending. That's not to say that lower spending increases in the last four years would have produced better test results; the mere fact that two circumstances occurred simultaneously does not mean that one drove the other. The same is true of the belief that spending and achievement are directly related. State test scores have increased while spending also increased, but correlation does not imply causation.

In fact, efforts to obtain proof of the relationship from the Kansas Department of Education have been unsuccessful. State Board of Education member Dr. Walt Chappell filed an Open Records Request on June 9, 2009 asking for "...research which has been done by the KSDE or by researchers contracted by the KSDE which supports a claim that student achievement scores have risen in Kansas due to increased funds appropriated by the Legislature following the Montoy case. Conversely, please provide any research for Kansas which shows at what amount of budget reduction will test scores for Reading, Math, Science, History/Government fall and by how much in what grades and subjects." ¹²

¹² Letter from Dr. Walt Chappell to Dr. Alexa Posny, Kansas Commissioner of Education (June 9, 2009), copy in author's possession.

The response to Dr. Chappell's request referenced a comment in a Legislative Post Audit (LPA) study of school expenditures from the school years 2000 through 2005 that said, "We found a strong association between the amounts districts spend and the outcomes they achieve.¹³ In the cost function results, a 1.0% increase in district performance outcomes was associated with a 0.83% increase in spending—almost a one-to-one relationship. This means that, all other things being equal, districts that spent more had better student performance. The results were statistically significant beyond the 0.01 level, which means we can be more than 99% confident there is a relationship between spending and outcomes."¹⁴

Dr. Chappell replied, saying his request was for research conducted subsequent to the increased funding following the Montoy case (post-2005). The response again referenced the LPA study and concluded "...KSDE does not have any other records that are responsive to your request." Accordingly, it can be reasonably concluded that the Kansas Department of Education's sole basis for their belief that is that single paragraph in the LPA cost study.

Interestingly, the Department of Education failed to mention that that same LPA study also disclosed the existence of reputable research that both supported and contradicted their own conclusion.¹⁷ In answering Question 3 of the audit: What Does the Educational Research Show About the Correlation Between the Amount of Money Spent on K-12 Education and Educational Outcomes?, LPA stated:

Educational research offers mixed opinions about whether increased spending for educational inputs is related to improved student performance. Well-known researchers who have reviewed that body of research have come to opposite conclusions. Likewise, individual studies of specific educational inputs we reviewed sometimes concluded additional resources were associated with improved outcomes, and sometimes concluded they weren't. Because of perceived shortcomings in many of the studies that have been conducted in these areas, many researchers think more and better studies are needed to help determine under which circumstances additional resources actually lead to better outcomes.¹⁸

It is quite astonishing that professional educators (and others) would base their claims on the connection between spending and achievement on a single finding in an audit report and ignore contradictory evidence disclosed in that same report, especially since the LPA audit did not say that higher spending *caused* higher achievement. LPA found correlation, but not causation.

25-C

There is also existing academic research that says "recent changes to school funding in Kansas reveal little evidence of improving student outcomes as measured by test scores." Dr. Florence Neymotin, an Assistant Professor of Economics at Kansas State University and a Visiting Research Fellow with the Center for Applied Economics at the University of Kansas, conducted the study. She describes it as "...the first-ever economic analysis of the most recent amendments to the School District Finance and Quality Performance Act on student outcomes." Her research did find "weak evidence" of improved graduation rates.

One of the researchers mentioned in the LPA audit, Dr. Eric Hanushek of Stanford University, recently co-authored a book with Alfred Lindseth that describes how improved school finance policies can be used to meet achievement goals. The book explores the effectiveness of several court-mandated funding increases (including *Montoy vs. State of Kansas*) and also delves into the vast differences between state and national achievement scores.²⁰

This is another important piece of examining the relationship between spending and achievement, because while Kansas' state-assessed scores have grown considerably over the last decade, Kansas' scores have shown little change on the National Assessment of Educational Progress (NAEP), a test given in all states and supervised by the National Center for Education Statistics within the U.S. Department of Education.²¹

Hanushek and Lindseth provide a compelling explanation of the discrepancy between state and national assessment scores:

Although No Child Left Behind (NCLB) increased the importance of...proficiency levels...it left the task of defining "proficiency" up to the individual states. The result is different standards and testing regimes from state to state. Some state

¹⁹ Dr. Florence Neymotin, "The Relationship Between School Funding and Student Achievement in Kansas Public Schools," December 2008, Center for Applied Economics at the University of Kansas. (http://www.business.ku.edu/_FileLibrary/PageFile/1041/TR08-1205--EducationSpending_Neymotin.pdf, accessed Dec. 28, 2009).

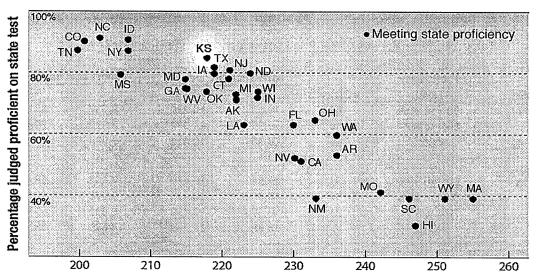

²⁰ A review published at Education News.org calls the book "...the most cogent and comprehensive analysis of America's school-finance challenges that I have ever seen. They establish the fundamental problem, which is that achievement isn't where it needs to be. They show how education resources have soared even as test scores and graduation rates have stagnated. They examine the unsuccessful efforts of elected officials to solve this problem by fiddling with funding formulae, special programs, class sizes and other input manipulations. They examine the even less successful (but often costlier) efforts to solve it via the courts--and show how none of the most popular approaches to revamping school financing via judicial action in the name of 'adequacy' is based on anything real. As they dryly remark, "The absence of a systematic positive relationship between spending and achievement presents a real challenge to the consultants who purport to describe the spending necessary to achieve adequate levels of student achievement." Finally, they offer a plausible alternative approach, a "performance-based funding system" which, in shortest form, says "focus funding and policy decisions on student outcomes, provide incentives and funding to achieve outcome goals, and evaluate whether what is being done is consistent with improving student outcomes." (Yes, there are 70 more pages elaborating on this, how to do it--and what all needs to change (plenty) in order for it to happen.) This book deserves serious attention by everyone concerned with student achievement and school finance." http://www.ednews.org/articles/schoolhouses-courthouses-and-statehouses-solving-the-funding-achievement-puzzle-in-americas-public-schools.html, accessed Dec. 28, 2009.

²¹ John LaPlante, "K-12 Spending and Achievement in Kansas: 2008 Edition," (<u>www.kansaspolicy.org/library/policyanalysis</u>, accessed Dec. 28, 2009).

have adopted rigorous and demanding standards that define proficiency at a level considerably above that achieved by students in the past, while for others proficiency is quite similar to the performance level of students when the standards were adopted. These differences in definitions of proficiency levels have led to a situation in which states with high proficiency standards have large numbers of "failing" schools under NCLB, while states with low standards have relatively few "failing" schools.²²

They demonstrate their point with an eye-opening graph that plots the percentage of students scoring at or above the state proficiency level on the fourth grade math test in 2005 and compares this with the NAEP score that would correspond to each state's proficiency cutoff level.²³

Passing Rate On State Fourth Grace Math Tests, Compared With NAEP Scores Equivalent To State Proficiency Cutoff Score

Test difficulty as seen by NAEP score equivalency for state proficiency cut-off

They say the pattern is clear:

Those states where the NAEP equivalent cutoff level is low...have much higher pass rates on their state tests, while state where the NAEP equivalent cutoff is high...have the lowest passing rates on their state tests.²⁴

According to their graph, Kansas is one of those states with a low NAEP cutoff level (218 in the above example) and high pass rates. The NAEP scale ranges from 0 to 500 on both Reading and Math.

o/2-8

We decided to test the theory that higher spending leads to higher achievement by comparing state assessment scores and per-pupil spending for individual Kansas school districts. We used the 2007-08 Reading and Math proficiency scores (percent of students scoring Proficient or better) for individual grade levels to arrive at an average Proficiency score for the district. Then we grouped districts by enrollment size and compared those average proficiency scores to per-pupil spending to see if districts with the highest per-pupil spending tended to have the highest proficiency scores.

As shown below, we found extreme per-pupil spending ranges within the same proficiency range for both Reading and Math. Table 12 only includes districts with FTE enrollment between 100 and 499 but there are very similar findings in all district sizes (this particular grouping was selected because it contains the greatest number of school districts). See Appendix "E" and Appendix "F" for complete district comparisons of Reading and Math, respectively.

Table 12: Wide Ranges of Per Pupil Spending at Each Proficiency Level

	Proficiency		Total Spen	ding per FTE	High - Lov	/ Variance
Subject	Level	# Districts	High	Low	\$	%
Reading	90% to 99%	66	19,035	10,299	8,737	85%
	80% to 89%	46	19,992	11,082	8,910	80%
	< 80%	16	18,305	10,421	7,884	76%
Math	90% to 99%	34	17,542	10,440	7,102	68%
	80% to 89%	57	19,992	10,421	9,571	92%
	70% to 79%	31	16,990	10,299	6,691	65%
	< 70%	6	16,883	12,244	4,639	38%

Source: Kansas Dept. of Education; districts with FTE enrollment between 100 and 499

This methodology accounts for cost variances due to district size but other factors, most notably enrollment size and varying levels of students classified as Special Education, At Risk and English Language Learners (ELL) will have an impact on per-pupil spending. However, we also found many anomalies within those categories. For example, one might reasonably expect districts with the highest levels of students classified as Special Education, At Risk and ELL to have the highest cost per-pupil, and districts with the lowest levels of those to have the lowest costs. Surprisingly, we found nine districts with very high levels of students in these classifications that actually spent \$1,065 per-pupil less than the overall state average. We also found 86 districts with below-average enrollment levels of high-cost students (and not Special Education host districts) that spent \$984 per-pupil <u>more</u> than the state average. A complete listing of districts grouped by enrollment size that compares spending, achievement

²⁵ The data actually shows that 18 other districts fit this description but they are part of a Special Education co-op and we excluded them because Special Education co-op costs are not allocated to member districts, thereby understating the total cost of member districts and overstating total costs of host districts.

and the percentage enrollment in Special Education, At Risk and ELL can be found in Appendix "G."

Regardless of allowances made for mitigating circumstances, the data simply does not support Department of Education claims that higher spending leads to higher achievement, nor does it support fears that reduced spending will lead to lower achievement levels. Some districts' demonstrated ability to achieve high scores on state assessed tests at below-average levels of per-pupil spending is significant (and also very encouraging). That's not to say that money is not a factor, but there is no compelling evidence to justify fears that spending less-especially if driven by efficiency-will cause proficiency scores to decline.

District Size

As shown in Table 8, small districts typically cost more per-pupil to operate than larger ones, and some of Kansas' smaller districts are losing enrollment. In FY 2005 there were only four districts with fewer than 100 students; by FY 2008 there were seven and in FY 2009 there were nine. The cost of operating the smallest districts, which are likely to continue losing enrollment, will grow exponentially unless something is done.

Consolidation of extremely small districts is not a popular topic for discussion, but one that should occur. USD 213 West Solomon is the smallest district in Kansas; in FY 2005 it had 63 FTE, dropped to 45.5 FTE in FY 2008 and declined further to 37.7 in FY 2009. Its current operating costs rose from \$14,380 per-pupil in FY 2005 to \$23,217 (budgeted) in FY 2009. (Even so, this district didn't have the highest per-pupil budgeted operating cost for FY 2009; that distinction went to USD 502 Lewis at \$24,282 per-pupil with FTE enrollment of 101.6).

Consolidation is not just a cost issue; it's also about the quality of education. At what point does a district become too small to be able to offer an education that will prepare students to enter the workforce, whether directly into their chosen field or first into higher levels of education?

III. Conclusion

There are, of course, ways to avoid school district consolidation and still reduce the cost of providing a quality education. As noted earlier, implementing the recommendations of mandatory efficiency audits could potentially save hundreds of millions of dollars. The Legislature could also entertain structural administrative changes in combination with a revised school funding formula that would encourage districts (or mandate for districts of certain enrollment size) to participate in regional shared service arrangements.

7/1-8 ()

Some districts are already involved in some measure of service sharing, but much more could (and should) be accomplished. There is tremendous potential for lowering non-instructional costs, whether through district consolidation or other shared service arrangements. Why, for example, should each small district have its own purchasing department, transportation infrastructure or business office? Consolidating the management of these and other non-instructional functions would not only eliminate some administrative costs but also create greater economies of scale for purchasing.

Now take that concept one step further and imagine the potential savings if districts all purchased some services and supplies through a statewide pool. Health care is a great example of a service that could purchased at much lower costs and still provide necessary localized service. In fact, it's already being done for State employees.

School districts employ about 70,000 people and let's assume that 40,000 of them participate in district medical plans (privacy laws prevent us from knowing which employees have specific types of coverage). For every \$100 per month in premium savings, taxpayers could save \$48 million per year, and since most districts are buying insurance for relatively small numbers of employees the real potential is enormous.

Efforts to lower the cost of education will not be easy given Kansans' preference for local control and strong lobbying efforts by districts to maintain the status quo and sue taxpayers for more money. The status quo, however, is not sustainable. Kansas already has an uncompetitive tax structure and unnecessarily raising taxes (instead of pursuing proven methods to provide a quality education at a lower cost) will only make it even more difficult to create jobs and retain population.

The data very strongly suggest that Kansans do not have to choose between higher taxes and cutting essential educational services. In fact, the enormous efficiency opportunities and large carryover cash reserves indicates that Kansans could have lower taxes and retain those essential services.

Cost Center Definitions

Instruction includes the activities dealing directly with the interaction between teachers and students. Teaching may be provided for students in a school classroom, in another location such as a home or hospital, and in other learning situations such as those involving co-curricular activities. This includes expenditures formerly reported under 3400 Student Activities. Teaching may also be provided through some other approved medium such as two-way interactive video, television, radio, telephone, and correspondence. Included here are the activities of aides or classroom assistants of any type (clerks, graders, teaching machines, etc.) which assist in the instructional process. Included are regular and part-time teachers, teacher aides or assistants, homebound teachers, hospital-based teachers, substitute teachers, and teachers on sabbatical leave.

Support Services (Students) Activities designed to assess and improve the well-being of students and to supplement the teaching process. Include only staff in attendance and social work services, substance abuse, guidance, health, psychology, speech pathology, and audiology.

Support Services - Instruction. Activities associated with assisting the instructional staff with the content and process of providing learning experiences for students. Includes such things as library media services, instruction related technology and assessment of students.

Support Services-General Administration Activities concerned with establishing and administering policy for operating the Local Education Agency (LEA). Include only board of education staff, board secretary/clerk staff, staff relations and negotiations staff, the superintendent's staff, assistant superintendents, area directors, and the superintendent. This would also include supplies and materials and other operational expenses of the central office.

Support Services-School Administration Activities concerned with overall administrative responsibility for a school. Include only the staff of the office of the principal (including vice principals and other assistants), full-time department chairpersons and the principal. This would also include secretarial, clerical and coordination of instructional activities staff. Supplies, materials and other operation expenses for the school building should also be included here.

Central Services. Activities that support other administrative and instructional functions including fiscal services, human resources, planning, and administrative information technology.

Operation and Maintenance of Plant. Activities concerned with keeping the physical plant open, comfortable, and safe for use, and keeping the grounds, buildings, and equipment in effective working condition and state of repair. This includes such things as maintenance of buildings and grounds, repairing equipment, utilities, building insurance and security staff.

Student Transportation. Activities concerned with conveying students to and from school, as provided by state and federal law. This includes trips between home and school, and trips to and from school activities.

Community Services Operations. Activities concerned with providing community services to students, staff or other community participants. Examples of this function would be the operation of a community swimming pool, a recreation program, etc.

Food Services Operations. Activities concerned with providing food to students and staff in a school or LEA. This service area includes preparing and serving regular and incidental meals, lunches, or snacks in connection with school activities and food delivery.

## Testimony before the **House Appropriations Committee**

by

## Mark Tallman, Assistant Executive Director/Advocacy Kansas Association of School Boards

### January 21, 2010

Mr. Chairman, Members of the Committee:

I have been invited to appear before the committee to discuss some general issues regarding school finance, in particular concerning school district balances. I have attached several documents, which I will review for your consideration. However, I wanted to begin with several items discussed by the Kansas Public Policy Institute.

### **Cash Balances**

Total Budgeted District Expenditures, 2009-10:

\$5,595.1 million

Total Cash Reserves, July 1:

\$1,458.9 million

### Restricted Funds:

Capital Outlay	\$451.7 million
Bond and Interest	\$344.3 million
Special Reserve	\$86.1 million
Textbooks	\$43.3 million
Supplemental General	\$42.2 million
Gifts and Grants	\$23.5 million
Special Liability	\$8.7 million

Total Unavailable:

\$999.8 million

Remaining balances:

\$459.2 million = 8.2% of budgeted expenditures

\$466.3 million (One-twelfth of total)

State General Statutory Ending Balance Requirement:

7.5%

Cash balances are maintained for the following reasons:

- 1. Legal requirements.
- 2. Building capital outlay reserves for major projects, earning interest without paying debt.
- 3. Providing "cash flow" for expenditures that occur before state aid arrives.
- 4. A cushion if state aid or other income is delayed or reduced.
- 5. Unexpected expenses (roof repair, bus replacement, etc.)

These decisions are made by local elected officials, accountable to the voters in their community.

### **School District Efficiencies**

It has been suggested districts could save money by reducing spending to the "average" costs in various budget areas. However, school district budgets are essentially set by the state. Similar districts have similar budgets. Districts that are high spending in some areas compensate by being low spending in others. Suggesting districts can reduce spending to the "average" means they would have to give up the benefits of spending where they are "high," but must continue to live with the trade-offs where they are "low," as the following chart demonstrates.

	Instruction:	Leadership,	Student		Budget Based On Low
	Teachers	Prof. Develop	Services	Total	Averages
District A	\$5,000	\$2,000	\$1,000	\$8,000	\$7,333
District B	\$4,000	\$1,000	\$3,000	\$8,000	\$6,666
District C	\$6,000	\$1,000	\$1,000	\$8,000	\$7,000
Average	\$5,000	\$1,333	\$1,667	\$8,000	\$7,000

Please remember the following: First, simply cutting costs is not the same as being more efficient. Efficiency means getting the same (or better) results at less cost. Second, school district spending should be valued for reasons other than test scores alone. Third, Kansas communities may have different values and priorities. That is why we elect local school boards, and why the authority of school boards is written into the Kansas Constitution.

### Kansas Association of School Boards, July 2009

Mark Tallman, Assistant Executive Director/Advocacy

### Introduction

Educational attainment is crucial to the future economic and social well-being of our society. The economic value of education to individuals, states and society as a whole is increasing. Kansas has made vast strides in improving educational attainment and ranks in the top third of states by education levels. This has given Kansas among the highest per capita income and lowest poverty rates in the region.

Spending on public education has increased significantly, in part due to equally significant increases in requirements, standards and student needs. However, current school district spending has **not** significantly increased compared to Kansas personal income. State aid to public schools **has** increased faster than personal income, but this has resulted in lower overall property taxes and a more equal tax burden.

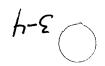

In recent years, the people, through their state and federal elected officials, have demanded even greater education outcomes. In 2005, the Kansas Supreme Court ruled the state was not providing constitutionally suitable funding to meet these outcomes, based on the Legislature's own cost studies. In response, the Legislature approved changes that resulted in over \$900 million in additional funding.

With additional funding has come substantially improved educational results. By every academic measure, student achievement has improved; student groups targeted for special assistance have seen even more progress; and on national measures, Kansas ranks among the most successful states and has been improving faster than the national average.

States spending more on education usually have better academic results. That is certainly true among states in the region where Kansas is a clear leader. But Kansas student achievement ranks among the best in the nation, despite spending below the national average, based on the most recent information available.

But the progress of recent years is threatened by the state's budget crisis. For the 2009-10 school year, the Legislature has failed to fund many commitments made following the Supreme Court decision, and reduced state aid by \$125.5 million. Without federal stimulus funding, which expires after next year, the reduction would be \$320 million. Estimates from the Kansas Legislative Research Department indicate even deeper cuts are likely for 2010-11 and beyond.

Although the national recession has made the state budget situation much worse, the deteriorating financial position is rooted in years of targeted tax cuts and diversions from the State General Fund. The state must decide whether its current tax policies are more important than funding to meet its stated educational objectives. Failure to sustain suitable funding for the educational interests of the state is not only contrary to the state constitution, it threatens the future of the state and its people.

#### 1. WHY IS PUBLIC EDUCATION IMPORTANT TO KANSAS?

Kansas public schools have consistently educated approximately 90 percent of the school children in the state. Despite what critics of public education claim, Kansas educational expectations and outcomes have simply never been higher than today.

Long-Term Educational Attainment. According to the U.S. Census, the percent of Kansans 25 and older with a high school diploma was just 28.5 percent in 1940. It has steadily increased every decade since, reaching 86 percent in 2000. Kansans with a college degree rose from 4.6 percent in 1940 to 25.8 percent in 2000.

Educational attainment by African Americans in Kansas has risen even more dramatically, from 16 percent with a high school diploma in 1940, to 79.7 percent in 2000; and just 2.3 percent with a college degree in 1940, to 14.9 percent in 2000. Hispanic attainment has only been reported since 1980. Adult Hispanics with a high school diploma rose from 53.2 percent in 1980, to 58.1 percent in 1990, but dropped to 51.7 percent in 2000. Hispanics with a college degree rose from 8.7 percent to 10.1 percent, but dropped slightly to 9.7 percent in 2000. However, a significant number of Hispanics immigrated to Kansas from other states or countries and are not the products of Kansas public schools.

**Progress in Recent Years.** According to the latest estimates from the National Center for Education Statistics, these trends have continued since 2000, with the percent of Kansans 25 and older with a high school diploma increasing from 86 percent to 88.7 percent in 2005, and those with a college degree increasing from 25.8 percent to 28.7 percent.

For those most recently attending public schools, Kansans ages 18 to 24, the percent with a high school diploma increased from 78.3 percent to 84.2 percent between 2000 and 2005. Another indicator is the cumulative promotion index, which measures the percent of students graduating in four years. A report from *Education Week* and *Editorial Projects in Education* found the Kansas index rose from 72.8 percent in 1996 to 75.4 percent in 2006. Kansas was one of a minority of states showing improvement between 2005 and 2006. These reports indicate a growing number of students who do not graduate in four years go on to receive a diploma through various drop-out recovery programs operated by school districts or cooperatives.

**Economic Impact of Education.** Education has become the single most critical factor in social and economic well-being. Most would agree the benefits of education go far beyond earning power alone, but that is one of the few ways to measure the individual impact of educational attainment.

The United States is in the midst of a growing social divide based on education levels. Between 1973 and 2007, growth in family income based on education, adjusted for inflation, changed as follows:

Educational Attainment	Average Income, 2005	Change in Family Income, 1973-2007, Adjusted for Inflation		
Some high school; no degree	\$17,299	-15.7%		
High school diploma	\$26,933	+3.3%		
Some college	\$30,627	+15.8%		
Bachelor's degree	\$52,671	+36.3%		
Advanced college degree	\$66,754 (Master's Degree) \$112,902 (Professional Degree) \$91,370 (Doctoral Degree)	+48.3%		

	Economic Pro	sperity Indicators	Educational Level for Population over 25 years, 2006

Source: U.S. Census	s Bureau, Bureau of Ec	onomic Analysis					

Kansas ranks in the top half of the nation  $-21^{st}$  – in per capita income. Among neighboring and Plains states, only Colorado and Minnesota have higher per capita income than Kansas, with Nebraska close behind. These four states have the highest overall educational attainment. South Dakota, Iowa, Missouri, North Dakota, and Oklahoma have lower per capita income than Kansas, and lower educational attainment. Kansas is a high income point on the prairie because it is a high education point as well.

Likewise, only Minnesota and Iowa had a lower *poverty* rate than Kansas in 2007. The states with the highest poverty in the region have the lowest education levels.

Other Benefits of Education. Improving educational attainment has an impact on at least two other areas concerning public well-being. Numerous studies have shown higher educational levels are associated with better health outcomes. Other studies demonstrate improving outcomes, such as cutting the drop-out rate, reduces crime.

Spending on education is by far the largest part of the state budget, with K-12 receiving about 54 percent of the State General Fund (SGF) and higher education another 11 percent. The other major components of the SGF budget are human services, particularly health care, and public safety. By reducing poverty, improving health care and reducing crime, improved educational outcomes can reduce the need for public spending.

If Kansans are going to prosper economically and socially, the state must continue to increase education attainment. Of course, the same is true for the United States compared to the rest of the world.

#### 2. HOW MUCH HAS EDUCATIONAL FUNDING INCREASED?

Some have noted school district funding has increased significantly in recent years, while there has been almost no increase in total statewide student enrollment. Public school enrollment is almost unchanged between 1997-98 and 2009-10, yet total expenditures from all sources – federal, state and local – have risen by 83.6 percent, or \$2.5 billion. That means total spending per pupil has increased over 83 percent, or about 7.0 percent per year.

School Funding and Kansas Income. Was that increase excessive? Total personal income in Kansas rose from \$63.4 billion in 1997 to \$106.4 billion in 2008. (Figures for 2009 and 2010 are not available.) That is 68 percent or 6.8 percent per year – just slightly less than education funding increased.

Actually, that is true over a much longer period of time. Total school district enrollment today is very close to total enrollment 35 years ago. Since 1975, school district operating budgets have increased over 700 percent. But Kansas per capita income increased over 800 percent between 1970 and 2007, exceeding the national average. As Kansas school districts have improved educational attainment, earnings have increased so K-12 education has, in a sense, paid for itself. As a percent of Kansas personal income, school district operating budgets (including federal stimulus funds) are now equal to where they were in 1997, and close to the 35-year average. In other words, the overall cost of funding public education has not significantly increased compared to income.

It is true *state aid* for school districts has increased more rapidly in the past 35 years. That is because the state has assumed a larger role in funding education, both to provide more equal education opportunities and to reduce reliance on local property taxes. In 1992, the new school finance formula raised state taxes but significantly reduced school district property taxes in most districts. In the 1990s, the statewide mill levy was reduced from 35 to 20 mills and removed from motor vehicles. The state also began assisting districts with lower valuations per pupil in building construction, remodeling and equipment, and increased the state share of the local option budget.

How was the money used? Since 1998, per pupil spending has increased about 7.0 percent per year. But spending per pupil doesn't explain that a large share of the new money didn't go to regular classroom education but for targeted programs. Nearly \$600 million more in state funding went to special education and to help students at-risk of failing and to vocational classes and transportation costs. Another \$200 million was federal funding for special education, aid for disadvantaged students, instructional and technology aid, and school lunches. These targeted purposes amounted to one-third of the total increase since 1998.

Without those dollars, per student spending increased about 4.2 percent per year. The biggest expense for most districts is employee costs. From 1997-98 to 2008-09, average teacher salaries, including benefits, increased from \$36,505 to \$52,869: 45 percent or 4.1 percent per year. Districts spend almost exactly the same share of their operating budgets on teacher salaries today as they did 35 years ago (over 50 percent). But they now employ many more classroom teachers to meet the changing needs of students and higher expectations.

## 3. WHY HAVE EDUCATIONAL COSTS INCREASED?

Although the number of students has not changed much over the past 35 years, the type of students, the services they receive and the outcomes expected have changed dramatically.

• Special Education. Before federal and state requirements for disabled students began in the 1970s, these children received little or no schooling. The number of children served and the cost of these programs have increased dramatically, fueled by demands from parents, advocates, elected officials and the courts; and by medical advances, de-institutionalization and privatization. The "excess cost" of special education

- Children At-Risk. For decades, it has been documented that lower income, English language learners and children from some minority groups have lagged significantly behind in educational attainment. This is true nationally, and in private schools as well as public schools. Both national and state studies, such as the 2006 Legislative Post Audit Cost Study, have shown it is much more expensive to educate these students to high standards. These children comprise a much larger percentage of school district enrollments today. Districts have added numerous programs to help them succeed.
- Demographic Changes. The single greatest factor contributing to enrollment growth in Kansas public schools is Hispanic immigration. Without these students, Kansas enrollment would have declined over 5 percent this decade. This change is a stark contrast to decades of net out-migration from Kansas, and other Plains states. Some estimates are that over 90 percent of the Hispanic children in the United States are citizens. However, Hispanic high school students in Kansas currently suffer dropout rates exceeding one-third, and without dramatic change will create a huge unskilled workforce over the next generation, for whom jobs may be scarce and wages low.
- **Higher Standards.** Until fairly recent changes in the economy, it was accepted that many students could drop out of high school or leave with relatively low skills because the U.S. economy provided jobs that could support these individuals and their families. That is no longer the case. Competing in the new knowledge-based economy requires almost all students reach to levels never previously expected or attained by the public school system. Other nations are also raising educational attainment to meet and surpass expectations in the United States.

In addition to these demographic and economic changes, the state constitution, Legislature and State Board of Education have imposed legal requirements that have increased costs.

Rising Expectations. The Kansas Constitution's Article Six requires a system of public education to provide for "intellectual, educational, vocational, and scientific *improvement*." In 1992, the Kansas Legislature required school accreditation be based on a system of "*measurable improvement*" in school performance. In 2003, the Kansas State Board of Education adopted the standards of the federal No Child Left Behind Act, which requires schools meet annual targets in student proficiency, based on reading and math state assessments, *increasing* every year until 2014 when 100% of students must be proficient.

Legislative Cost Studies. Twice in the past 10 years, the Kansas Legislature commissioned studies to determine the cost of "suitable" education funding as required by the Kansas Constitution. Both the Augenblick and Myers (2001) study and the Legislative Post Audit (2006) study came to similar conclusions. Neither study indicated public schools were failing, or performance was declining. Instead, using four different approaches, the two studies found funding was inadequate to meet increasing standards, especially for students in groups with historically lower performance now being held to the same rising expectations.

Montoy Case. Based on those studies, the Kansas Supreme Court held in the Montoy lawsuit the Legislature was failing to provide suitable funding of education, as required by Article Six of the Kansas Constitution. It should be noted neither the Legislature nor Kansas State Board of Education, both of which were defendants in the Montoy case, made any effort to reduce state performance standards when told what they would cost, even after the Court ordered the Legislature to increase school funding based on those costs.

#### 4. WHAT HAS HAPPENED TO STUDENT ACHIEVEMENT?

Between 1998 and 2009, school district general fund budgets, determined by the state, increased by \$941 million, or 41.6 percent. But over 60 percent of that amount (\$583 million) was targeted funding for special education, at-risk programs, bilingual education, vocational education and mandatory transportation costs. Without those increases, state funding for "regular" education increased just 15.8 percent over that period, or less than 1.5 percent per year. To compensate, school districts increased local option budgets by \$673 million. What were the results of that funding?

- Between 2000 and 2008, the percent of students scoring proficient or higher on all four state assessments (reading, writing, science and history/government) increased at equal to or greater than the percentage increase in both school district budgets and state aid.
- For every student group that received targeted funding increases (students with disabilities, bilingual, and free lunch), the achievement gap on state assessments narrowed substantially. This also raised the achievement of minority groups, doubling or tripling their proficiency rates.
- Kansas ACT scores for graduating seniors increased every year from 2003 to 2008, exceeding both the average and rate of increase for both Kansas and other states with universities in the "Big 12." Kansas also has one of the highest rates of high school graduates taking the ACT.
- On the National Assessment of Education Progress, Kansas combined fourth and eighth grade reading and math scores increased from 12th in the nation in 2003, to 11th in 2005 and seventh in 2007. Kansas now has the highest combined scores among "Big 12" states.
- Between 1996 and 2006, Kansas increased its national ranking for graduation rates using the cumulative promotion index basically the percentage of students graduating in four years from 21st to 16th.

On every measure, Kansas academic indicators have improved; where there was targeted additional funding, the improvement was even greater, and on every national comparative measure, Kansas improved faster than the national average.

It has been noted student performance was improving on many measures *before* the Court-ordered additional funding reached districts beginning in 2006. But as also noted, education funding has been increasing for the past decade, especially in targeted areas. The Legislature began increasing at-risk funding before the *Montoy* decision. Federal funding increased significantly when the No Child Left Behind Act passed in 2001, but leveled off after the cost of the Iraq war increased. Local districts increased funding to expand all-day kindergarten programs. Arguably, it was the success of these programs that convinced the courts that funding DOES make a difference – the same conclusion the Legislative Post Audit study found in 2006.

### 5. DO NATIONAL TESTS SHOW MOST KANSAS STUDENTS ARE FAILING?

Some critics of Kansas public schools charge additional funding for education hasn't been effective because less than half of Kansas fourth and eighth graders tested by the National Assessment of Education Progress (NAEP) scored "proficient" in reading and math. Several facts must be kept in mind.

NAEP assessments only test a small sample of Kansas students, and are not based on Kansas academic
standards. The NAEP provides a general measure of Kansas academic performance compared to other
states, but is not designed to assess how students are mastering the standards adopted by Kansas education
officials. Kansas schools are held accountable for performance on Kansas assessments, not on the NAEP.

- According to the National Assessment Governing Board, which oversees NAEP policies, "In particular, it is important to understand clearly that the Proficient achievement level does not refer to 'at grade level'....Students who may be considered proficient in a subject to the common usage of the term, might not satisfy the requirements of the NAEP achievement level." In other words, the NAEP "Proficient" level is a very challenging standard. Documents from NAEP indicate that if there is a benchmark for "passing," it is the "Basic" level.
- No states have even a majority of students scoring "Proficient" on each of these tests, and studies from the
  U.S. Department of Education also using NAEP results show both private schools and public charter
  schools have performance levels similar to public schools taking into account differences in student
  characteristics.

Here is the percentage of Kansas students scoring at both "Basic" and "Proficient" levels on the 2007 NAEP, compared to the U.S. average.

2007 National Assessment of Education Progress										
	Basic or Hi	ther In	Proficient of	r Higher						
	Kansas	U.S.	Kansas	U.S.						
Grade 4 Math:	89%	81%	51%	39%						
Grade 8 Math:	81%	70%	40%	31%						
Grade 4 Reading:	72%	66%	36%	32%						
Grade 8 Reading:	81%	73%	35%	29%						

Obviously, a solid majority of Kansas students tested by the NAEP are "passing." Regardless of the standard, Kansas significantly exceeds the national average. Also, every state that exceeds Kansas in the combined percentage of students at "Proficient" on all four tests spent significantly more per pupil than Kansas.

	2007 NAEP, Combined Percent at Proficient	NAEP National Rank at Proficient	2006 Current Spending Per Pupil	Spending Per Pupil National Rank
Massachusetts	201	1	\$11,981	5.
New Jersey	174	2	\$14,630	2
Vermont	173	3	\$12,614	3
New Hampshire	168	4	\$10,079	13
Minnesota	168	5	\$9,158	21
Kansas	162	6	\$8,392	30

## 6. HOW DOES KANSAS SPENDING AND RESULTS COMPARE TO OTHER STATES?

Kansas school spending has clearly been effective in producing positive results. But how does the cost of those results compare to spending in other states?

The most recent national data on school spending from the National Center for Education Statistics is for FY 2006, which included the first and largest increase following the *Montoy* decision. Even after this increase, Kansas was still below the national average, and ranked in the bottom half of states on both total revenue per pupil and current spending per pupil (which excludes debt service and capital costs).

in the second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second se	2006 Funding	Per Pupil	Educational Achievement (with Regional Rank)

Among the nine neighboring and Plains states, Kansas ranked third in total revenue and fourth in current spending. On achievement measures, Kansas ranked second for high school completers, fourth in average ACT scores, and second in NAEP scores at both the basic and proficient level. In other words, Kansans are getting educational results in line with what they spend per student – or better.

In the following table, the 50 states were ranked on six broad measures of educational outcomes: the combined percent of students scoring at "basic" on the 2007 NAEP, the combined percent at "proficient," the percent of 18- to 24-year-olds completing high school, and the percent of adults 25 and older with a high school diploma, bachelor's degree and advanced degree, which produced an average rank on all six measures. Total current expenditures per pupil are also provided.

13.8 Virginia	\$9,447	20.3 New York	\$14,884	26.7 Alaska	\$11.460	35.7 Texas	\$7,561	44.0 Alabama	\$7,646
14.5 Maryland	\$10,670	21.2 Hawaii	\$9,876	27.5 Michigan	\$9,572	36.7 New Mexico	\$8,086	49.5 Mississippi	\$7,221
Average per pupil:	\$10,786	Average per pupil:	\$9,501	Average per pupil:	\$9,893	Average per pupil:	\$7,766	Average per pupil:	\$7,749

The table shows the top achieving states tend to spend most per pupil, but there are exceptions – such as Kansas, with spending below the national average but top 10 achievements. On the other hand, the bottom 20 states in achievement spend on average \$3,000 less per pupil than the top 10 states, and \$2,000 per pupil less than the Second Ten and Third Ten.
