Testimony before the Senate Utilities Committee
Senate Bill 401
March 11, 2004

Chairman Clark and Members of the Committee:

Occasionally I compare the MCF on my royalty statements with the MCF reported to the county (Stevens) by the gas company.

This year I have made this comparison on 2 wells, (one Hugoton, one infill) reported to the county. The MCF on these 2 wells is combined on the royalty statement as one. This comparison shows the gas company MCF for the years to be less than the MCF on my royalty statement.

I am unable to determine the reason for this difference.
